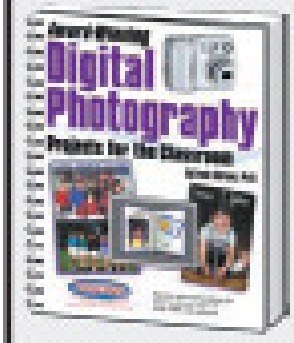
Award-Winning Digital Photography Projects for the Classroom



In this book, Dr. Abrams lays out over 60 lesson plans he has developed for using digital cameras and digital imaging (including scanners, printers and software) with students and faculty. The projects cover a wide range of curriculum areas and grade levels. For each project, one side of the page is a worksheet for students to follow and the other side contains a lesson plan for the teacher to manage the project. The book also contains tips for managing digital photography equipment and projects with students.
