

What is a WAMS Wisconsin User ID?

The State's Web Access Management System (WAMS) allows authorized individuals to access—using the same means of identification—all secured State internet applications to which they have been granted permission.

Why do I need a WAMS Wisconsin User ID?

To protect your privacy and the privacy of others, you will be asked to register for a Wisconsin User ID to access restricted information or services available from the Department of Public Instruction. Once the ID is created it will be used to grant permissions for various secure DPI applications. When you log in to the LDS secure system, your Wisconsin User ID and password verify your identity so that we can provide you with access to the appropriate information and services while preventing access by unauthorized individuals.

Do I already have a WAMS Wisconsin User ID?

You might. If you signed up for an ID in the past to use a different State secured application such as WSL / ISES—or even to reserve a campground through the DNR website—you already have a WAMS ID and can use your ID. If you have switched districts since creating your WAMS account, you may have one from a previous district. If this is the case you should use the same ID but you will need to update your profile. If you are unsure whether you have a WAMS ID, you can either try logging in on the WAMS website, or send an email to LDShelp@dpi.wi.gov and we will try to assist you.

How do I create a WAMS account for myself?

Setting up a WAMS account involves four simple steps:

1. Go to the WAMS homepage: <https://on.wisconsin.gov/WAMS/home>.
2. Select "Self Registration."
3. Provide the required information.
4. When you receive a confirmation email from the WAMS system, follow the link given to log in and verify your account.

I have a WAMS ID but can't log in to LDS applications. Why?

While you need to have a WAMS ID to be given access to and to log in to LDS applications, you will not be able to log in until you first ensure that your district is authorized to use LDS applications (you can check here: <https://wlds.dpi.wi.gov/ldsutil/admin/lookup>), and second contact the administrator listed to request access to the appropriate application(s).

Where can I find out more information about the Wisconsin User ID/WAMS ID?
