### ***DLM Testing Window Temporarily Closed & Update on DLM Test Administration Monitoring Report***

***March 27, 2015***

*A problem has been discovered with the algorithm that assigns testlets during the spring window. The magnitude of the problem is not clear. It may affect only a few percent of students, but the actual number is not yet known. We are tracking down the problem and will be fixing it as soon as possible. To ensure us the time necessary to prevent students from being assigned testlets incorrectly we need to shut down DLM from **6:00 pm Central Time Friday, March 27 until 6:00 am Central Time Thursday, April 2**. Please do not attempt to test DLM students during this window.*

*A problem has also been identified with the DLM Test Administration Monitoring extract available in Educator Portal. This extract has been temporarily disabled. When the problems have been fixed and the extract is ready to use again, we will post an announcement to the Test Updates list and web page to notify you that it is ready to use.*

*Please share this message with your colleagues and tell them how to subscribe to DLM Test Updates. Always check your state page on the DLM site to see if an update applies to your state. Thank you.*

*Best Regards,  
The DLM Team*
