Wisconsin Future Ready State Report – Consolidated Report

As of June 30, 2016 for 56 School Districts

The state of Wisconsin uses the Future Ready Assessment to gauge the readiness of its districts for digital learning.

The purpose of the Future Ready framework is to determine the digital learning readiness of a district to begin successful implementation in schools and classrooms. To that end, the Future Ready assessments analyze digital learning readiness based on seven interdependent gears, plus leadership. Those include:

- Curriculum, Instruction, and Assessment
- Use of Space and Time
- Robust Infrastructure
- Data and Privacy
- Community Partnerships
- Personalized Professional Learning
- Budget and Resources
- Across the Gears: Collaborative Leadership

As of mid-July 2016, fifty-five (55) school districts had completed the District Assessment. A much smaller number had participated in the individual Gear Assessments that provide a deeper review of readiness Gear by Gear.

Wisconsin Data

The first section of this report aggregates the data from all of those school districts, per the Future Ready Privacy Policy that allows aggregated reports of all data collected on the Future Ready Dashboard. Thus, all 55 districts are represented.

The second section of this report provides detailed information on the forty-seven (47) districts that have signed a release form, allowing the Wisconsin Department of Education to access their data.

The spreadsheets that accompany this report provide Future Ready datasets for the 47 districts with signed data release forms allowing the Wisconsin DPI to access their data.

**Section 1: Consolidated Digital Learning Report for Wisconsin**

This first section includes a consolidated summary report representing the 55 schools that had participated in the Future Ready assessments as of June 30, 2016.

District Assessments

District leadership teams participating in Future Ready initially meet together to discuss the questions on the district self-assessment, entering consensus responses. Those responses are consolidated into a 1-10 rating for each gear. The overall rating is the average across the gears ratings (see chart below).

The average across the gears for the 55 Wisconsin school districts is 6.2 (of 10). The leading indicators of digital learning are Robust Infrastructure (7.7) and Data and Privacy (7.0), and the lagging indicators are Use of Space and Time (4.5), Curriculum, Instruction, and Assessment (5.9), and Collaborative Leadership (5.9).

Figure 1. The average Digital Learning Ratings from the District Assessment across the 55 Wisconsin school district as of 6/30/16.

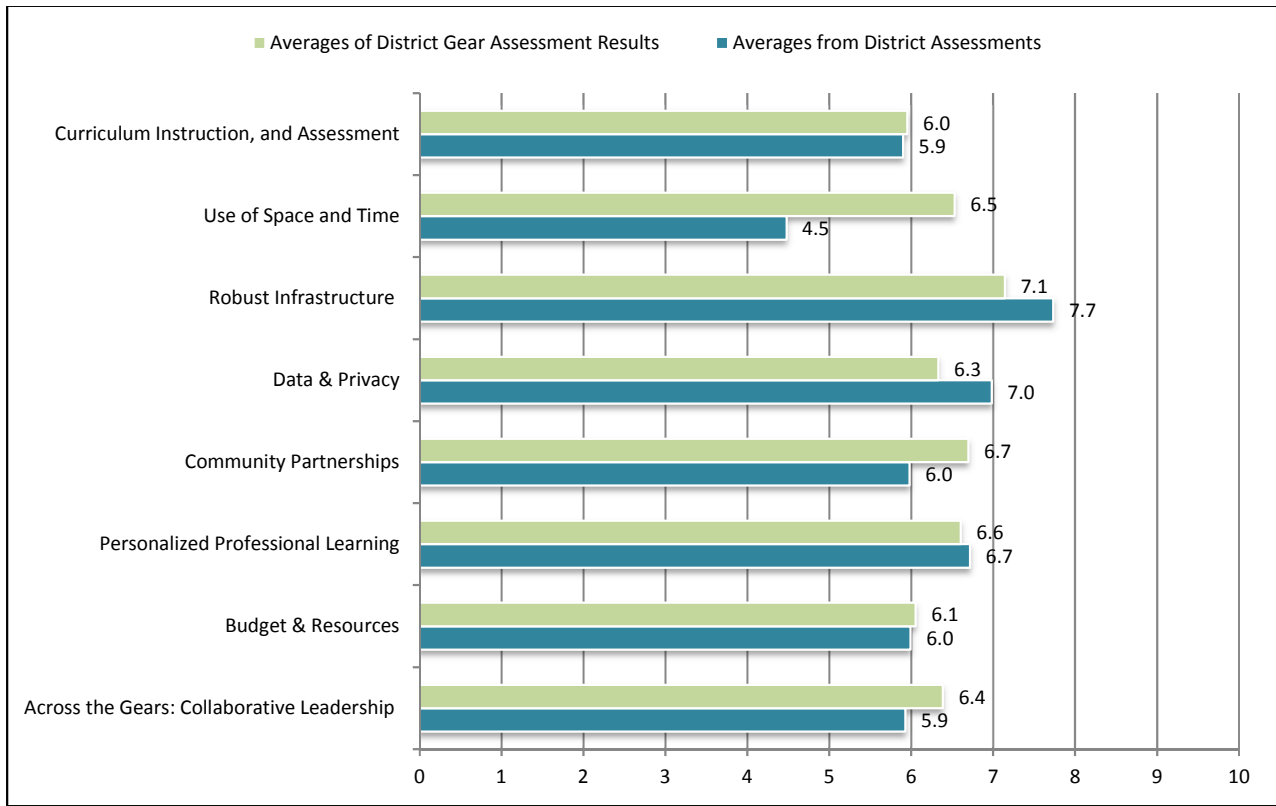

n= 55 District Assessments completed by school district leadership teams

Gear Assessments

Some of the Wisconsin 55 Districts also completed the more detailed Gear Assessments. Those are a separate set of 8 assessments (one for each Gear) offered to districts for participation by individuals selected by the district in order to gain multiple perspectives on the details of the Gear. Results are aggregated into Gear reports. The figure below compares the results from the aggregated Gear Assessments averaged across the districts that participated in those Gear assessments, versus the results from the District Assessment displayed above. It should be noted that the number of participating districts in the Gear Assessments is relatively low. The number of participating individuals in any Gear Assessment for a particular school district ranges from 1 to 5. See Table 1. As noted in Table 1, only 12 of the 55 districts took the individual Gear Assessments.

Total n = 55 districts; 55 District Leadership Self-Assessments (DTA) assessments

Table 1: Gear Assessment Participation Numbers

Gear Name	Number of Participating Districts	Number of Assessment Respondents	Average Score
Curriculum, Instruction, and Assessment	8	33	6.0
Use of Space and Time	3	8	6.5
Robust Infrastructure	12	28	7.1
Data & Privacy	10	24	6.3
Community Partnerships	3	8	6.7
Personalized Professional Learning	7	32	6.6
Budget & Resources	7	16	6.1
Across the Gears: Collaborative Leadership	4	8	6.4

Based on the average scores from the Gear Assessment from the 12 participating districts, the leading indicator are Robust Infrastructure (7.1) and Community Partnerships (6.7), whereas the lagging indicators are Curriculum, Instruction, and Assessment (6.0) and Budget and Resources (6.1).

It is insightful to compare leading and lagging indicators based on average scores from the District Assessment versus the Gear Assessments. The District Assessment represents the consensus voice of the District Leadership Team whereas the Gear Assessment represents other stakeholder groups.

Section 2: Data Specific to the Districts That Signed the Data Release Form

As of June 30, 2016, forty- seven (47) Wisconsin school districts agreed to provide the Wisconsin DPI with access to their data. A listing of those 47 school districts is listed below in Table 3. The spreadsheets that accompany this report provide their individual datasets.

The District Assessment, which is completed by the district leadership team, analyzes those data by Gear, resulting in a Gear Readiness score based on the district team assessment. Those are listed below in
 for each of the forty-seven districts.
