Agenda

Overview

- GASB Statement No. 96 provides guidance on the accounting and financial reporting for subscription-based information technology arrangements (SBITAs) for government end users
- The statement:
 - Defines a SBITA
 - Establishes that a SBITA results in a right-to-use subscription asset (an intangible asset) and a corresponding subscription liability
 - Provides criteria for capitalization of outlays other than subscription payments
 - Outlines the framework for additional note disclosures in financial statement audits

Goals of GASB 96

Transparency

- Better meet the information needs of financial statement users by disclosing right-to-use assets and future SBITA liabilities

Comparability

- Improve the comparability of financial statements by establishing uniform guidance for SBITA reporting

Consistency

- Apply consistent accounting practices from its counter-part, GASB 87

Implementation Date

GASB Statement No. 96 is effective for fiscal years beginning after June 15, 2022, so District's will be required to implement for fiscal years ended ***June 30, 2023***

What is a SBITA?

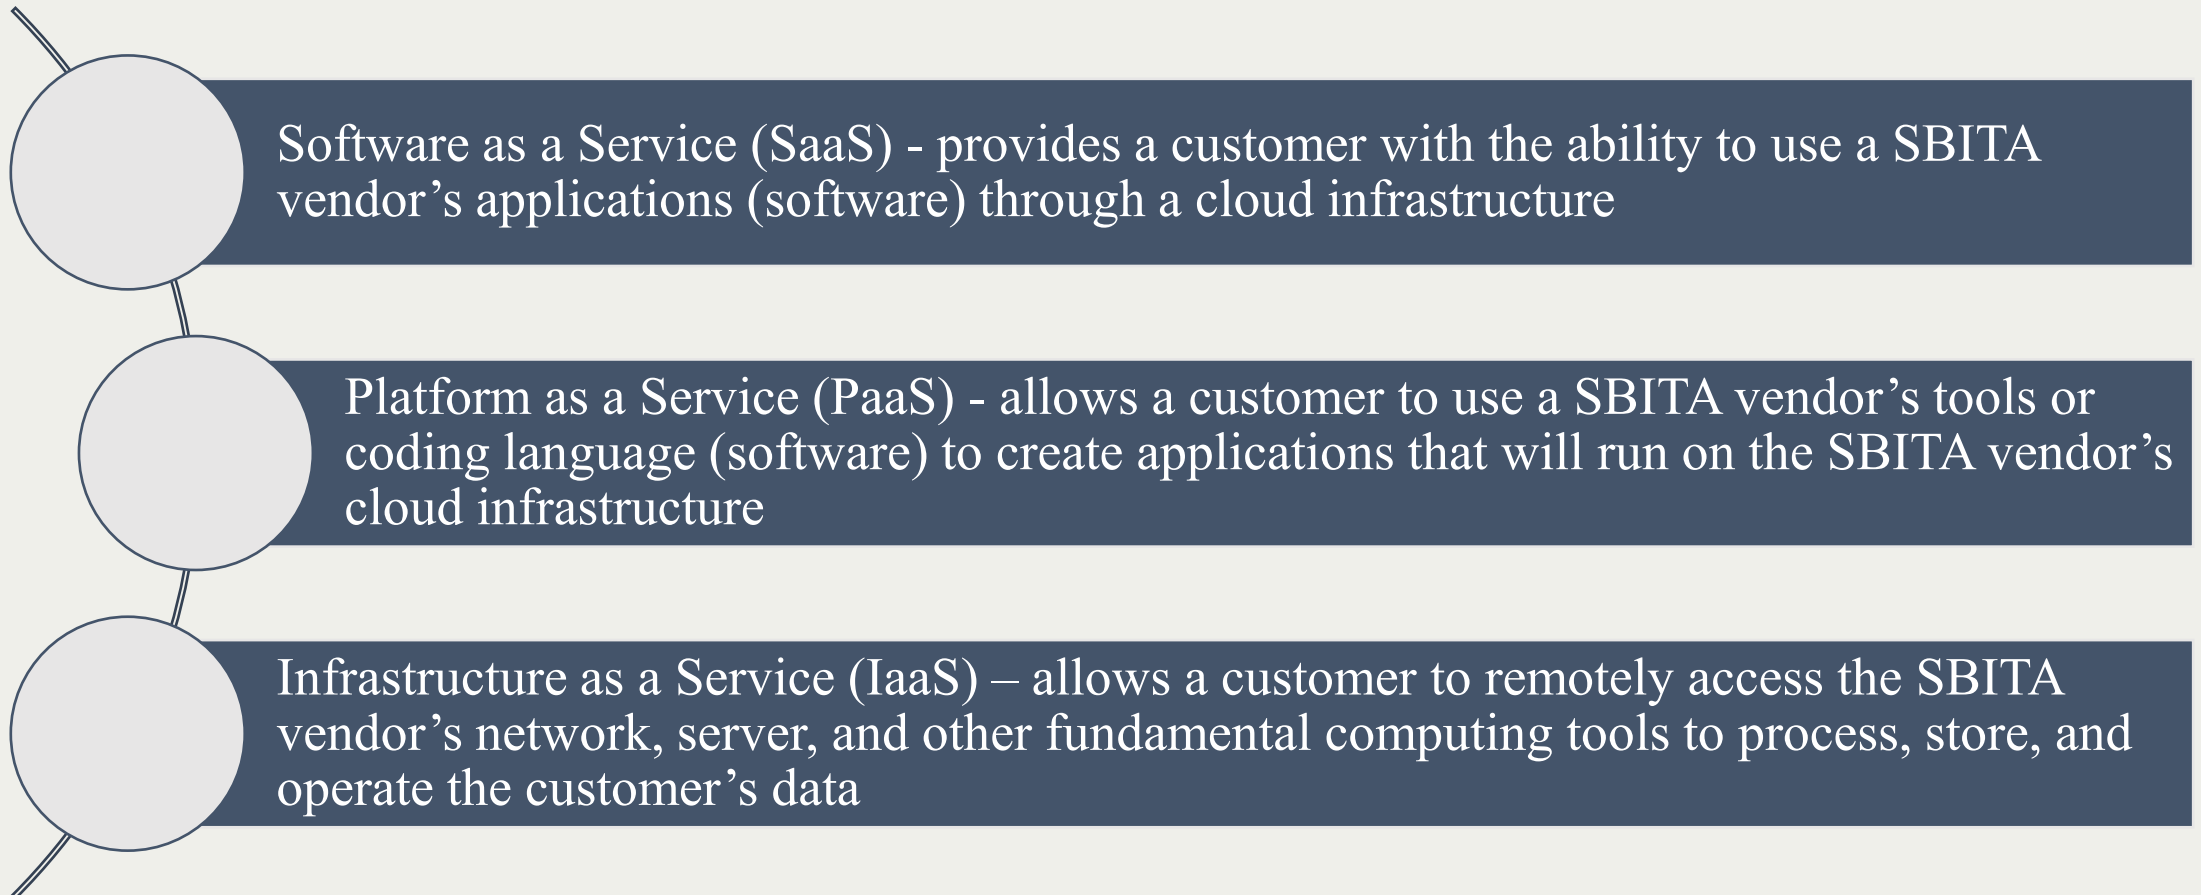

- Contract that conveys **control** of the right to use another party's (a SBITA vendor's) IT software, alone or in combination with tangible capital assets (the underlying IT assets), as specified in the contract for a period of time in an **exchange or exchange-like transaction**
- To determine whether a contract conveys **control** of the right to use asset, assess whether it has both of the following:

The right to obtain the present service capacity (the right to the benefits generated) from use of the underlying IT asset as specified in the contract.

AND

The right to determine the nature and manner of use of the underlying IT asset as specified in the contract.

Cloud Computing Arrangements

What is a not a SBITA?

- **Exclusions:**

- Contracts that include a hardware component, where the software component is insignificant
- Contracts that have cancellation clauses at *any time* by both parties or contracts in which the “*non-cancellable*” period has already passed
- Contracts that solely provide IT *support* services
- Short-term SBITA’s
 - Contracts with a term of *less than 12 months* (including any options to extend, regardless of probability of renewal)
 - Payments on short-term contracts are expensed
- Perpetual Licensing Arrangements (considered a software purchase, not subscription)
- Immaterial SBITAs ~ work with your auditors

District Responsibilities

- **“Gathering” Phase**

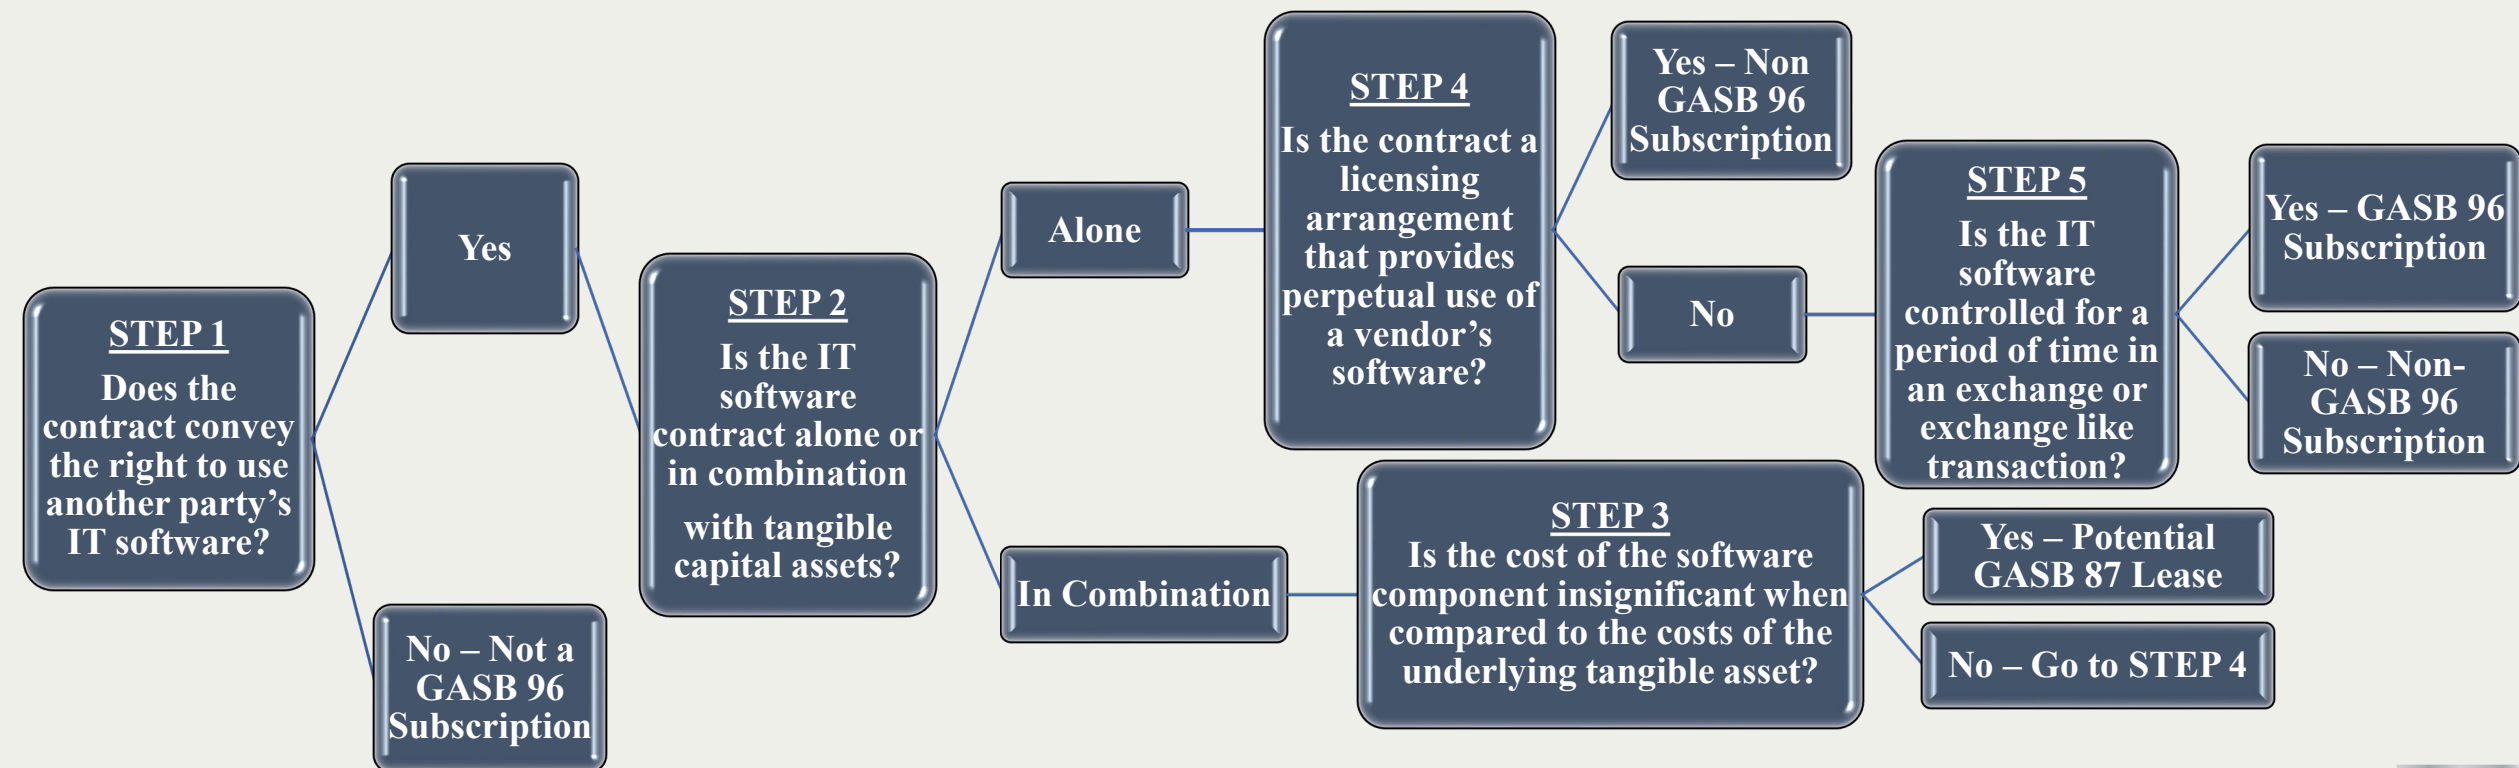

- Step 1: Prepare list of all subscription-based IT arrangements
 - Relevant Information: Subscription terms, interest rates, payment information
 - Work with IT Department and those responsible for tracking SBITA's
 - Keep agreements and all subsequent amendments in a folder for auditors
- Step 2: Rule out contracts that do not meet the necessary criteria
- Step 3: Work with auditors on their preferred method of preparing necessary schedules
 - Each firm may have their own template that will assist with present value calculation and amortization

Auditor Responsibilities

- **“Analyzing” Phase**

- Step 1: Review District’s list of potential SBITA’s that they felt met SBITA requirements
- Step 2: Helping to interpret certain pieces of SBITA agreements that Districts are unsure on
 - Examples: measurement of agreement period, termination clauses, optional renewal periods
- Step 3: Assisting Districts with government-wide journal entries for audit reporting
- Step 4: Preparation of related footnote disclosures

GASB 96: Decision Tree

Measurement of Subscription Period

- Period in which a government has a *noncancellable* right to use an underlying IT Asset
- Include any of the following, if applicable:
 - Periods covered by a government's option to extend or terminate the SBITA, if it is reasonably certain that the *government* will exercise the option
 - Periods covered by a SBITA vendor's option to extend and/or terminate the SBITA, if it is reasonably certain that the *vendor* will exercise the option

When to Remeasure the Liability

A District should remeasure the subscription liability annually if one or more of the following changes have occurred:

There is a change in the subscription term

There is a change in the estimated amounts for subscription payments already included in the measurement

A change in the interest rate the SBITA vendor charges

An event occurs that causes variable payments that were contingent on the performance or use of the underlying IT assets to become fixed for the remainder of the subscription term

Accounting for SBITAs Under GASB 96

Initial Liability Recognition

- Present value of subscription payments expected to be made during the term
- Discounted using the interest rate the SBITA vendor charges the government. If the interest rate cannot be readily determined, estimated incremental borrowing rate should be used.

Initial Asset Recognition

- Initial Subscription Liability *plus*
- Payments made to vendor before the commencement of the subscription *plus*
- Capitalizable implementation costs* *less*
- Incentives received by the vendor

Annual Amortization

- Amortization of the discount on the subscription liability as an outflow of resources (i.e., interest expense)
- Asset amortized in a systematic and rational manner over shorter of subscription term or useful life of IT asset

*Implementation costs are all ancillary charges necessary to place the subscription asset into service

- Configuration, coding, testing, installation
- Data conversion to the extent required to place the asset into service

SBITA Example and Journal Entries

Anywhere School District – June 30 Year-End

- **SBITA Information**

- Subscription Start Date: July 1, 2022
- Subscription End Date: June 30, 2025
- First Payment: July 1, 2022
- Payments: \$5,000 annually, paid at the beginning of the period
- Interest Rate: 3.50%

- **Additional Costs**

- Preliminary Project Stage Costs - \$1,000 to a consultant for assistance in selection of software (expensed as incurred)
- Implementation Stage Costs - \$3,000 to transfer data to the new software (capitalized and amortized)
- Operation and Additional Implementation Stage Costs - \$2,000 to convert legacy data on an old server to vendor's cloud storage (expensed as incurred)

Footnote Disclosures

General Description of SBITAs

- Include basis, terms, and conditions on which variable payments not included in the measurement are determined

Total Amount of subscription assets and related amortization

- Disclosed Separate from other Capital Assets

Amount of Outflows recognized in the current year

- Variable payments not previously included
- Other payments such as termination penalties not previously included

Footnote Disclosures - Continued

Principal and Interest Requirements to Maturity

- Separately for each of the subsequent five years
- Five-year increments thereafter

Commitments under SBITAs before the commencement of the subscription term

- Ex: Significant contract entered into prior to year-end, but subscription term has not started at the financial statement date

Impairment losses, if applicable

- Very unlikely
