Indicator 8: Parent Involvement Survey – Parent Survey Manager User Guide

1. Introduction

The Indicator 8: Parent Survey Manager web application will first be used by districts included in the 2015-2016 self-assessment cycle. For these districts, the application will create two survey codes for students included in the October 1 Child Count and districts can also add students to the survey that may either transfer into the district or become eligible for special education after October 1 in the district’s self-assessment year. The survey site that parents will use is hosted by the Wisconsin Department of Public Instruction (DPI), so real-time response rates can be tracked by districts.

Prior to the 2015-2016 cycle year, districts downloaded a fixed student list from the Special Education Web Portal and the survey was hosted by a third party. Survey results were only received from the third party once every two weeks during the survey cycle.

Please also see the Indicator 8 website: <http://dpi.wi.gov/sped/about/state-performance-plan/indicators/8-parent-involvement/law>

2. Special Education Web Portal

The application is accessed through the Special Education Web Portal (<https://apps4.dpi.wi.gov/seportal>).

2.1. Granting Access

Directors of Special Education

Users with the role of Director of Special Education will have access to the application by default.

District Users

All users who had been granted access to the previous 'Indicator 8' application were automatically granted access to the new Indicator 8: Parent Survey Manager application.

The application will not be displayed on the Main Menu if a District User has not specifically been granted access to it by their Director of Special Education.

If any other users require access to the application, they will need to request it from the district's Director of Special Education. This is usually (but not always) the person listed in the Special Education Leadership Directory: <https://apps4.dpi.wi.gov/speddir>

3.5.1. Data Elements – Required Districts

Total Students

This is the total number of students that have not been excluded at the time of survey activation. If you add students after survey activation, this figure is not updated.

Required Responses

This figure is based on the total number of students on the Student List page that haven't been excluded at the time the LEA activates the survey. A statistical formula is applied to this figure (confidence level of 95 and confidence interval of 10) which is the Response Rate Sample. The Required Responses figure is 20% of the Response Rate Sample or 6 respondents, whichever is higher.

Responses Submitted

This is the total number of families that have submitted a survey. Surveys that are Declined do NOT count towards the Responses Submitted figure.

As stated when you hover over the heading of this figure, if both parents respond, only one response is counted here.

A red x appears if you have not yet met the required response rate (as displayed in [section 3.5](#))

A green checkmark appears if you have met the required response rate.

Response Rate Met

Districts that do not meet the required response rate must repeat the survey again the following year.

Indicator 8: Parent Involvement Survey – Parent Survey Manager User Guide

3.5.2. Data Elements – Optional Districts

Optional districts (districts who are not required to conduct the survey in a given year) are not assigned survey codes and are not required to meet a certain response rate.

7.4. Add Student

If a student has recently become a student with an IEP or a student with an IEP has transferred to your district, you can manually add the student by adding their WSN and providing a disability for the student.

Students can be added at any point during the survey window, however if you know a student has become eligible to take the survey between October 1 and the start of the survey window, the student should be added prior to activating the survey.

 - If the student recently transferred into your district, speak with the district WSLs Coordinator to ensure that the WSN has been received from the previous districts or created if the student hasn’t been enrolled in a Wisconsin public school before.

7.5. Download Student List

Once you have activated the survey, the Download button will appear on the Student List and Survey Codes page. You can merge this list with parent information from your local systems or if you have a small number of students you can manually enter the parent information into the downloaded spreadsheet.

Once parent information has been added you can merge the spreadsheet with the [form letter](#) that is available on the Indicator 8 webpage to send parents their survey codes (usernames and passwords).

Students you excluded from the survey prior to survey activation are not included in the downloaded Student List.

The screenshot shows the 'Indicator 8: Parent Survey Manager' interface. At the top, there is a navigation bar with 'Home', 'Students', 'Preview', and 'Reports' menus, and an 'Exit to Portal' link. Below this is a header indicating the 'School Year: 2015-2016 | Hustisford School District - 2625 | REQUIRED Collection Year' and a user profile 'yj2625'. The main heading is 'Student List and Survey Codes'. There are two buttons: '+ Add Student' and 'Download', with the 'Download' button highlighted by a red rectangle. Indicator 8: Parent Involvement Survey
 English, School Age, 2015-2016

Welcome!

We invite you to fill out a survey for us. We are the Special Education Team of the Wisconsin Department of Public Instruction (WDPI). This is a survey for parents of children and youth with disabilities. It is to ask about how your school joins with you as a partner in your child's education.

We are required to collect this information by federal law. The law is the Individuals with Disabilities Education Act (IDEA 2004). We will use your answers to give better services to children and youth with disabilities and their families. We need your help to do this. Your privacy is also important. Your name is not connected to the answers you give to these questions. Your answers will not change your child's education or services.

Thank you for taking the time to fill out the survey. The full survey should take about 20 minutes or less to complete. Before you start, please read the *Consent Statement*.

Consent Statement

Please read this Consent Statement carefully.

Reasons for the Survey: The Office of Special Education of the U.S. Department of Education requires WDPI to collect information. Some of the information must be about parent involvement in their child's special education program. The information helps the WDPI and schools give better services to children and youth with disabilities and their families.

Risks of Filling Out the Survey: There are no risks to you if you fill out this survey. Your answers will not change the special education or services that the school gives to your child.

Privacy: Your own answers to this survey are kept private. WDPI will NOT link you or your child to your answers in any reports. All reports will combine answers from many parents.

Voluntary Nature for Filling Out the Survey: WDPI is required to collect information from parents about their experiences with schools. You are not required to give the information. You can decide to fill out the survey or not to fill out the survey. Your decision will not change your relationships with WDPI or your school.

9.4.1. Header table

The fields in the Header table are largely the same as those in the Statewide Summary box of the Statewide Response Rate report page. See [section 9.1](#) for more details

School Year	Report Name	District Type	Total Districts	Not Activated	Activated	Response Rate Met	% Districts - Response Rate Met	Responses Submitted (Combined)	Date/Time Generated

9.4.2. Districts Not Activated Yet

This table includes the four digit district number and district name of those districts who have not yet activated the survey yet for their parents.

9.4.3. Activated Districts

The following fields are included on the Excel download of the report but are not included on the page. See [section 9.3](#) for an explanation of the fields that are also included on the page (District Number, District Name, Responses Submitted (Combined), Responses Required, Response Rate Met).

Field	Description
Unused Surveys (Combined)	The number of surveys that haven't been started by either parent.
Started Surveys (Combined)	The number of surveys that have been started by at least one parent.
Declined Surveys (Combined)	The number of surveys that have been declined by at least one parent.
Submitted (Code 1) / Submitted (Code 2)	The number of surveys (by Code 1 or Code 2) that have been submitted
Unused (Code 1) / Unused (Code 2)	The number of surveys that have not been started (by Code 1 or Code 2). It would be likely that the Unused number of Code 2 surveys would be high as only one parent needs to take the survey.
Started (Code 1) / Started (Code 2)	The number of surveys that have been started but not submitted (by Code 1 or Code 2).
Declined (Code 1) / Declined (Code 2)	The number of surveys that have been declined (by Code 1 or Code 2).

10. Parent Comments

After the survey window has been closed by DPI, the Parent Comments report will appear underneath the Reports menu option. When the Parent Comments option is selected, an Excel report is downloaded to your computer.

On the final page of the survey, parents can choose to give comments. The following prompt is shown to them:

“Please write any additional information that you think is important for improving the special education services students with disabilities receive.

Your comments are optional. If you choose to give comments, they will be used by the Wisconsin Department of Public Instruction to better inform districts of the feelings and needs of families.”

If the parent chooses to give comments, an additional question appears below the comment box

I would like my comments sent to...

- My school district's Pupil Services / Special Education Director and the Wisconsin Department of Public Instruction. If you choose to provide comments to your district's Pupil Services / Special Education Director, the school district may be able to identify the person completing this survey based on your comments.
- Only send my comments to the Wisconsin Department of Public Instruction.

The second option ‘Only send my comments to the Wisconsin Department of Public Instruction’ is the default option.

If the parent changes this answer to the first option, their comments will be included on the Parent Comments report that districts can access after the survey window has closed.

11. Appendix A – Merging Student List with Parent Information

In order to send out the usernames and password to all students, you'll need to download the student list (see [section 7.5](#)) and merge the list with parent information from the LEA's local information system.

The key field to use when merging these lists in the student WSN.

The following steps can be used to merge the information. Depending on your version of Excel, the steps may vary slightly.

- 1) Download the Student List spreadsheet from the Student List page ([section 7.5](#))
- 2) Open the spreadsheet and create a new tab called 'Parents'.
- 3) Create an Excel file of parent information for your local information system. Be sure to include the student WSN in the file.
- 4) Copy the parent information into the Parents tab you created in the Student List spreadsheet
- 5) Select the entire table of Parent information you just copied and name the table 'Data' and hit the Enter key

https://support.office.com/en-us/article/Define-and-use-names-in-formulas-4d0f13ac-53b7-422e-afd2-abd7ff379c64#bmquickly_name_a_cell_or_range_of_cells

	A	B	C	D	E	F
1	WSN	First Name	Last Name	Mail Line 1	Mail Line 2	Mail Line 3
2	1027778885	Peter	Smith	123 Apple St.	Arcadia, WI 54612

- 6) Note down the column number of each of the columns in the Parents tab. These will be used in the VLOOKUP formulas on the Student tab. In the example above:
 - a. WSN is column 1
 - b. First Name is column 2
 - c. Last Name is column 3
 - d. Mail Line 1 is column 4
 - e. Mail Line 2 is column 5
 - f. Mail Line 3 is column 6
- 7) Go to the Students tab
 - a. In the First Name column, in the first row of data, start entering the VLOOKUP formula by typing =VLOOKUP(
 - b. Select the WSN in the same row you are entering the formula in. The column letter and row number will populate into the formula. Enter a comma and then type in 'Data' (the name you gave the Parents information). This is the data set being matched against.
 - c. Enter another comma and then type in the column number that corresponds to the First Name field on the Parents tab (see step 6). In this example, it is column 2.

Indicator 8: Parent Involvement Survey – Parent Survey Manager User Guide

- d. Enter another comma and type in FALSE. This means the formula will look for exact matches only.
 - e. Close the formula with a ')' and tab out of the field.
 - f. The parent's name should now appear in the First Name column if it worked correctly.
- 8) Repeat Step 7 for each field you need to source from the Parents tab.
 - 9) Once you've entered a formula into each column in your first row of data, you can copy those formulas down to the rest of the table.

Please refer to this example Student List spreadsheet that has already been merged with parent information to give the steps above more context.

<http://dpi.wi.gov/sites/default/files/imce/sped/xls/spp8-vlookup-example.xls>

Note 1: The Mail Line 1, Mail Line 2 and Mail Line 3 address fields are included in the Student List spreadsheet but are not in the form letter we provide on the Indicator 8 Parent Survey Resource page in the Parent Survey Letters section: <http://dpi.wi.gov/sped/about/state-performance-plan/indicators/8-parent-involvement/law>

Note 2: The VLOOKUP formula can return a zero (0) when the source field is blank (this may occur in Mail Line 3). If you have data in that manner then you need to adjust the formula to set these back to blank.

```
=IF(VLOOKUP(W2,Data,6,FALSE)="", "", VLOOKUP(W2,Data,6,FALSE))
```

"W2" refers to first column W in row 2 of your spreadsheet – which is the default position of the first WSN in the file. Column 6 of the 'Data' (Parents) table refers to Mail Line 3 in the example.
