

Hello Everyone,
Here are several interesting items for you to review:

Asthma, Asthma, and More Asthma/Health Insurance

Join me for this one day training Madison on

Thursday, November 6, 2014 from 10 am – 4pm Registration ends Thursday, Oct. 30th!

Register here: <https://www.regonline.com/Register/Checkin.aspx?EventID=1628638>

In the morning session we will cover: Hands on practice with asthma medication delivery devices, step up/step down plans, measuring asthma control, asthma action plans, connecting with providers and recent asthma research. The afternoon session will focus on ensuring that eligible children are enrolled in federal, state or local insurance programs and Express Enrollment basics. This session will prepare school nurses to do Express Enrollment for students in their district.

Full day attendance is recommended for school nurses in the Wellness Improves Learning for Youth project districts. There is also an option to attend the morning or afternoon session.

There is no cost to attend. Lunch will be provided. Contact Freddi at Freddi.adelson@dpi.wi.gov

From Appleton School Nurse Debbie Olson:

FARE teal pumpkin:

This is a movement to support children with food allergies at Halloween. At home, simply display the attached poster on your front door so children know that non-food treats are available. I went to the dollar store and picked up pencils, stickers, bubbles, etc. I plan to let the trick-or-treaters decide if they want a candy treat or a non-food treat.

Please feel free to share the attached poster with Wisconsin school nurses. What a great way to raise public awareness of food allergies and allow ALL children to participate in the fun Halloween festivities!

FARE teal pumpkin initiative attached

Wisconsin's data collection tool is now available!

Step Up Be Counted!!

The Wisconsin School Health Services Report is now available online for your review http://ssp.wi.gov/ssp_sndata . Please take time now to review the data collection tool and begin as soon as possible collecting the 2014-15 data. You, and what you do, are very important and we want to make sure that you are able to develop a system that will help you collect the needed data. The National Association of State School Nurse Consultants (NASSNC) and the National Association of School Nurses (NASN) have been working collaboratively for

several months and developed this easy-to-use national data collection tool. The collection tool should be used to collect data at the district level, and then sent on to the Wisconsin Department of Public Instruction to aggregate the data. The state data will be submitted nationally in an aggregated format. This will be a *first time effort* and we hope that everyone will participate. It is a voluntary report; however, the importance of reporting has never been more important! The tool is short and concise, and replaces the former Health Services Report. **It will need to be completed and submitted to DPI by June 19, 2015.** We want Wisconsin's data to be represented!! Join the NASN call to **STEP UP BE COUNTED** (<http://www.nasn.org/Research/StepUpBeCounted>) Review the NASN website or watch the webinars about the importance of data. Wisconsin school nurses will be helping each other tackle their district specific electronic student information systems, or in developing other collection methods.

Old data for the 2013-2014 school year can still be submitted through this link: <https://forms.dpi.wi.gov/se.ashx?s=56301B2D6C979307> You have until December 31st for the 2013-2014 data to be reported, but the sooner the better. The Wisconsin Association of School Nurses will again be offering an incentive to those school district nurses who participate in the report and register for the spring 2015 conference.

PROFESSIONAL DEVELOPMENT

School Nurses - Reduce Your Stress: Prepare Now For School Fieldtrips!

Original date changed due to illness of speaker

November 20th, Pewaukee, CESA 1, 4:30-6:30PM More info and registration:

<http://www.cesa1.k12.wi.us/programs/trainingforschoolnurses/>

This professional development opportunity for school nurses will allow nurses to identify key fieldtrip planning objectives and actions, both for student safety and nurse license protection.

New School Nurse Training: Presented by the DPI and the Wisconsin Association of School Nurses

November 5-6, 2014 *Just a few seats left!!!*

Crowne Plaza Hotel, Madison, WI

Call Bette Carr, school nurse consultant, with any questions: 608-266-8857

Registration: <https://www.regonline.com/2014newschoolnursetraining>

25th Annual Children Come First Conference: Fostering Resilience!! November 10-11th, Wisconsin Dells

<http://www.ccfconference.org/>

Building the Heart of Successful Schools Conference

The 2014 Building the Heart of Successful Schools conference brochure and registration web link are now available. The December 11-12 conference will take place at the Chula Vista Resort and Conference Center in Wisconsin Dells. More workshop options will be offered this year than past years and includes topics such as School Climate Improvement, Best Practices in Bullying Prevention, Alcohol and Other Drug Abuse Prevention Strategies, as well as an entire track on implementing student health and wellness activities. This year there will be a day-long pre-conference on December 10, focused exclusively on the PREPaRE crisis prevention plan and response model.

Registration and more information located at: http://sspw.dpi.wi.gov/sspw_buildingheart, and the conference brochure can be found at this site.

If you have any questions, please contact Elizabeth Pease at elizabeth.pease@dpi.wi.gov or 608-267-9240.

ABC's of Oral Health Webcast

On October 15, the ASTDD School and Adolescent Oral Health Committee Webinar partnered with the National Association of School Nurses (NASN) on a webcast, The ABCs of Oral Health.

Access the recorded webcast at [The ABCs of Oral Health](#) and view the PowerPoint at [The ABCs of Oral Health Webinar Slides](#)

RESOURCES

**Wisconsin Seal A Smile Program:
Short 3-minute video on the benefits of the
program:**

<http://www.chawisconsin.org/oral-health.php?pg=31>

www.WISHeSproject.org

The [WISHeS Project website](http://www.WISHeSproject.org) now contains **all the resources** created thus far, including [two new school nursing procedures and videos](#) developed in collaboration with the Department of Public Instruction. The procedures and videos produced are for the administration of buccal and intranasal emergency seizure medications. Another exciting feature to these two pages, is a downloadable [Skill Competency form](#). We will eventually be adding this feature to all of the procedure sites.

The two new resources that are being released today are:

[Care of the Student with Special Healthcare Needs](#), is an online training for unlicensed assistive personnel. The interactive training covers topics such as hand hygiene, oral care, feeding, transfers and diapering. The intent of the training is to provide unlicensed staff with the basic knowledge required to care for students who require these interventions while at school. The training incorporates the themes of compassion, empathy, patience, understanding and self-care. *Care of the Student with Special Healthcare Needs* also has a skills check off sheet the UAP prints at the completion of the training so they can complete the skills training with a licensed staff person. The second resource you will find on the newly redesigned website are [Injury and Illness Protocols](#). The Injury and Illness Protocols are meant to serve as basic injury and illness management and are intended to be used by staff without medical/nursing training, when a nurse or other medical professional is not available. We have developed 58 protocols ranging from asthma to vomiting. We recommend the protocols be reviewed and approved by the school district medical advisor. Information contained in the protocols was adapted from the Ohio Department of Public Safety's Emergency Guidelines for Schools, Third Edition and the Wisconsin Emergency Preparedness Guidelines for Schools.

After you have had time to review and use the new and older resources, please take some time to provide us with your feedback. Your feedback is essential for us to continue to improve the resources. You can provide your feedback by clicking [HERE](#) or by visiting the following website:

https://survey.qualtrics.com/SE/?SID=SV_dmrNo0aeSXScQWp.

As always, please feel free to call me or email me if you have any questions.

Community Health Improvement in Action (CHIA)

We are pleased to announce that a Request for Applications is now available inviting communities to join the *Community Health Improvement in Action (CHIA)* Community of Practice as funded partners. CHIA's Community of Practice will discuss common problems, share best practices, and collaboratively create solutions related to the implementation and evaluation of community health improvement strategies with an emphasis on approaches that address unhealthy and risky alcohol use in Wisconsin communities.

To support long-term and consistent engagement in its Community of Practice, CHIA is offering expert-facilitated training, technical assistance and up to \$2,000 to each of twenty funded-partner communities. The funding period is from January, 2015 through December, 2016, and applications are due November 10, 2014.

A Request for Applications (RFA) and Application Form at the [CHIA webpage](http://www.walhdab.org/CommunityHealthImprovementinActionCHIAProject.htm).
