4. Access to Health Insurance: Navigators serve as an in-person resource for Americans who want additional assistance when shopping for and enrolling in plans through the Health Insurance Marketplace. CMS (Centers for Medicare and Medicaid Services) has announced the funding for Navigator services for the coming year(s).

As I looked at the Wisconsin grant recipients, I noted that many of the WILY grant districts are covered by an agency that provides Navigation services. I listed the school districts following the grant recipients below so you will know who can provide this service in your area.

This press release gives details about the grant awards for each Wisconsin recipient
