Release Notes for 2/8/2018 WISEid/WISEstaff Production Release
(Core Apps Team Sprint 153 2-Week Work Cycle)

Feature Title	Notes
WISEid: Added optional email to Local Person ID record for Edit and Create Persons in the UI	In the User Interface (UI) only, you now have the option to add an email address when creating a person or when editing/adding a Local Person ID. This is not in the Uploads and Downloads yet. The ETA for that feature is June 2018.
WISEid: New error code 4038 when birth date value is missing a Year in Person Upload	We created a new first-level validation message when the year is missing in the Person Upload file. Previously, this scenario would cause a fault and was difficult to detect because if you opened the file in Excel, it would automatically add the current year.
WISEid: Created Change Requests for multiple Mother records	If you attempt to add multiple Mother/Parent/Guardian records, the new record change will generate a Change Request for DPI to review. The purpose of the review is to make sure you have the correct person and aren't updating the wrong record.
WISEid: Person Upload UI errors and download errors now match	We fixed an issue with Error 6443. When the Parent 1 Type was missing in the Person Upload file for a student, the Local Person ID Type was showing up in the Results Download but not in the User Interface (UI). This was fixed.

WISEstaff: Created Dashboard Hiring Agency Assignment Count drill-in report	On the Staff Dashboard on the WISEstaff homepage, the Hiring Agency Assignment Count chart widget now has the ability to drill into any bar on the chart to find the staff records that make up the count number shown on the graph. If the year is the current year, then you can click on the WISEid in the report to further drill into the actual current year staff record.
WISEstaff: Created Dashboard Hiring Agency Assignment FTE Sum drill-in report	On the WISEstaff homepage under the Staff Dashboard, the Hiring Agency Assignment FTE chart widget now has the ability to drill into any bar on the chart to find the staff records that make up that FTE sum. If the year is the current year, then you can click on the WISEid in the report to further drill into the actual current year staff record.
WISEstaff: Created Dashboard Hiring Agency Contract Count drill-in report	On the WISEstaff homepage under the Staff Dashboard, the Hiring Agency Contract Count chart widget now has the ability to drill into any bar on the chart and find the staff records that make up the count number shown on the graph. If the year is the current year, then you can click on the WISEid in the report to further drill into the actual current year staff record.
WISEstaff: Created Dashboard Hiring Agency WISEstaff Count drill-in report	On the WISEstaff homepage under the Staff Dashboard, the Hiring Agency Assignment Count chart widget now has the ability to drill into any bar on the chart and find the staff records that make up the count number shown

	on the graph. If the year is the current year, then you can click on the WISEid in the report to further drill into the actual current year staff record.
WISEstaff: Created WISEstaff Salary and Fringe Benefit Variance Report Part 1	We renamed the Data Validation Report *FTE, Contract Days and Salary Report* to the *Staff Salary and Fringe Benefit Variance Report*. We added columns for Previous Year Salary, Salary Change % (from previous year), Previous Year Fringe Benefit, Fringe Benefit Change %, and Fringe as % of Salary. This is the first step in major changes to this report, as in the next release we will add multiple filters to detect a number of potential data anomalies.
WISEstaff: Missing Entity ID WISEstaff Dashboard Widget opens in a new tab	On the WISEstaff homepage under the Staff Dashboard, when you click the icon in the Missing Entity ID widget, it now opens a new tab with the results in it. This will aid districts with long lists of Entity IDs.
