Release Notes for 7/17/2018 WISEid/WISEstaff Production Release
(Core Apps Team Sprint 164 2-Week Work Cycle)

Feature Title	Notes
WISEid: Purged Change Request History for Race/Ethnicity and Gender from system	In a previous release we stopped the creation of Race/Ethnicity and Gender Change Requests. In this release we removed the history of previous Race and Gender changes in the Message and Change Request screen to help speed up the screen's performance and remove clutter. There were complications when some records didn't get fully deleted, but that will be fixed in the next release.
WISEstaff: Aligned 'Is salary final' text with its drop-down field	On the Add/Edit Contract section in WISEstaff, we realigned fields, so now fields and labels line up correctly.
WISEstaff: Updates to Public Reports job functions	We redesigned the WISEstaff system, so we can create Public Staff Reports with a push of a button. This means next year we can publish reports more quickly. This will also enable us to publish this year's reports soon.
WISEstaff: Updated Public Staff reports to use School Directory mailing info	We added school and agency mailing addresses, including PO boxes from School Directory, to the Public All Staff Report Download starting with 2017-18 school year.
WISEid/WISEstaff: Change Request link works.	We fixed an issue on the Message and Change Request page where the

	WISEid and Local Person ID Type filters were broken.
