Release Notes for 8/22/2019 WISEid/WISEstaff Production Release

Feature Title	Notes
WISEid: Hotfix--Entity ID submission issues	We fixed an issue that blocked submitting Licensing Entity IDs in the application interface.
WISEid: Bug Fix--Faulting issue when WISEids are submitted with an unexpected format by users.	Adjusted WISEid upload system to not fault when a WISEid is unexpected format such as a birthdate or a name in the WISEid field. Now it will only block the row(s) with unexpected format data instead of the whole file.
