Release Notes for 2/22/2016 WISEid/WISEstaff Production Release (WISEid Core Apps Sprint 102)

Feature Title	Notes
WISEid: Upload 2016 Public Release - New Data Elements	Addition of birth location fields for summer 2016 release. Hidden until then.
WISEid / WISEstaff: Hotfix Require Contacts Prior to Allowing Verification (see US41894)	You must have required contacts before you verify them. Previously one could verify contacts without having required contacts for WISEid and WISEstaff.
WISEid: Bug Change History View Merge broken	A merged WISEid transaction was causing a 404 not found error in the Person Change History.
WISEid: New ASM Users Upload Files Disappear from Queue	When user first sets up WAMS logging their uploads would disappear from the Results queue data for User ID is refreshed during period copy jobs from WAMS. Changed application so uploads remain in the Results queue even if User ID info not determinable yet due to new user ID.
WISEstaff: Hotfix Time Out Error - Contract Add / Save & Contract Delete Functions	Contract Add/Save/Delete was timing out in the UI. We fixed this issue.
STAFF: Hotfix Assignments UI when dynamic question are null defaults	If a dynamic question for an assignment was not answered during an upload when user went to edit the assignment in the UI it would default to the default setting for new records.
STAFF: Hotfix Replace Snapshot 2015 Audit Results	Audit results for 14-15 were incorrect. Had to replace with correctly calculated results so we complete the some reporting for 14-15.
WISEid: Create WISEid Public Release Toggle	Toggle to hide features being hidden for summer release.

WISEid hotfix both instances: Contact types codes for WISEid	Contact type codes were incorrect.
WISEid: Hotfix Match Review Parent Guardian Info	On match reviews when you match to an existing person any new parent guardians in the upload now adds to existing person record matched to.
WISEid/Staff: Hotfix Disable 14-15 Contacts and contact validation	In the 14-15 instance we have removed contact validations for the 14-15 recollection. We will not be recollection contacts for 14-15.
STAFF: Performance Convert Assignment uploads to merge statement	Increased performance on Assignment Uploads.
STAFF: Performance Convert Contract uploads to merge SQL statements	Increased performance on the Contract Uploads.
Staff: Improve performance for saving Assignments	On Assignment UI improved performance of saving assignments.
WISEstaff: Hot Fix Reject File Upload When Incorrect Year Submitted by Instance	When users try to upload 14-15 data to the 15-16 instance or the other way around the upload is stopped from even being uploaded. This is so we don't have mixups once we enable 14-15 recollection site since there will be two sites.
STAFF: Hotfix restore initial audit checkboxes	Initial audit checkboxes were lost for a few hours on the first day of the rollout of the last release. We fixed this issue quickly.
