

# Release Notes for 12/9/2021

## WISEid/WISEstaff

### Production Release

Feature Title	Notes
WISEstaff: Improve Validate Staff Data comment box functionality	Increased comment box on the Validate Staff Data page to 500 characters from 250. Also, added validation to alert user if they try to exceed 500 characters. Previously comments over 250 would not save nor alert user of the issue.
WISEstaff: Delete from Staff List doesn't show completion message	Dialog boxes were not working properly for below so we fixed: <ul style="list-style-type: none"><li>• Staff List page/Delete Staff Person button.</li><li>• Edit Staff/Delete Entity Id button.</li></ul>
WISEstaff: Provide guidance for Entity ID CRs from file upload	Added a column to the View Upload Results grid: "Entity ID Changes" which will be populated if your file upload generated Entity ID Change Requests still under review.
