

Release Notes for 1/18/2022

WISEid/WISEstaff

Production Release

Feature Title	Notes
<p>WISEstaff: Hotfix -Filtering expiring PE and IE licenses when equivalent license exists</p>	<p>Licensing Expirations issues for License Download - Filter by License Expiration Date filter and Staff Data Quality Dashboard - Expiring Staff Licenses widget were fixed for cases where person has an expiring license but it shouldn't be counted as they also have another matching PE* or IE* licenses to replace it.</p>
<p>WISEstaff: Create a district dashboard widget showing # of district-wide teacher assignments</p>	<p>Created a new widget on the staff Data Quality Dashboard for "District-wide Teacher Assignments" count. If count is greater than 1 you will be able to click on the count and see the district-wide assignments that have Position = 53 Teachers and a school of 000 District-wide. KBA explaining can be found at https://dpidynamicsprd.powerappsportals.com/knowledgebase/article/KA-03605/en-us</p>
<p>WISEstaff: Improve handling of invalid Entity ID in Licensing Download</p>	<p>We changed the process so if an Entity ID is not valid it will not</p>

	<p>break the Licensing Download for the district that has them in the WISEstaff collection. Usually this is because a duplicate Entity ID was created and got merged into another one.</p>
