Release Notes for 3/9/2022
WISEid/WISEstaff
Production Release

Feature Title	Notes
WISEstaff: Hotfix Collection Checklist shows wrong task number when marked complete	Fixed on the Staff Collection Checklist logic for steps 3d and 3e were not working correctly.
WISEstaff: hotfix 6411 and 6360 warning validations not working correctly	Validation for warnings 6411 and 6360 was not saving comments and acknowledgements. Fixed so after running the validation refresh users can comment and save acknowledgement without losing it.
WISEstaff: License types are missing from Licensing Download	We thought we fixed all License Download issues last release. However problems were detected and we have no fixed all issues reported to us with this release.
