# FACILITATING THE FUTURE

2018 LEARNING COMMUNITIES

## **ServSafe** (June 18 & 19)

**\$200 STIPEND AVAILABLE TO FIRST 6 REGISTRANTS IN CESA 11/CESA 12 REGION**

Laura Feyma, New Richmond High School

### *Family and Consumer Science Teachers*

ServSafe is required by most restaurants as a basic credential for management staff. This course will give you the information necessary to study for the certification test. Testing can be completed outside of Facilitating the Future.

Day 1: ServSafe

Day 2: Field Trip & Coursework Implementation

## **Personalized Learning and Mindset** (June 18 & 19)

Sara Lindberg, CESA #11

### *Classroom Teachers, Principals*

In order to live, learn, and work in an ever-changing global society -one where 85% of jobs that will exist in 2030 haven't even been invented yet - students will need to be self-motivated learners who are strategic, purposeful, and resourceful. To foster the development of these skills, we need to offer flexible, personalized learning opportunities that support and challenge all students. This course will use Universal Design principles to introduce and support personalized learning components, like the learner profile, customized learning paths, and proficiency-based progress.

## **Financial Literacy Curriculum Camp** (June 18 & 19)

Jan Wickboldt, CESA #11

### *K-12 Teacher Teams in the areas of Personal Finance, Consumer Education or Math Teachers addressing Financial Literacy Curriculum*

Wisconsin was the first state in the nation to develop standards that define what students should know and be able to do related to personal financial literacy. With a wide range of borrowing options, students need to make wise financial decisions for everything from college to retirement as they avoid excessive debt and have adequate resources to meet their personal financial goals. This curriculum camp will provide tools for educators as they plan effective personal financial literacy lessons in their elementary and secondary classrooms.

## **Trauma Responsive Education/Mental Health First Aid** (June 18 & 19)

Senator Patty Schachtner, WITC

### *Principals, Counselors, Classroom Teachers*

Becoming trauma-informed means recognizing that people often have many different types of trauma and that, sometimes, survivors of trauma can be 're-traumatized' by well-meaning, educators. This course will give you the tools to take care of yourself and others in a healthy way, including assisting in a mental health crisis situation.

Day 1: Trauma-Responsive Education

Day 2: Mental Health First Aid Training

## **Drones in the Workforce: The Future is Now** (June 18 & 19)

Greg Paulsen, CESA #11 & Todd Poeschel, Durand High School

### *Career and Technical Education Teachers*

With drones becoming so prolific in society, the knowledge and skills required to operate and program UAVs is now a necessary technological literacy. Two of the nation's fastest growing jobs are drone operators and robot/drone programmers! During this workshop you will learn how drones fit into Career and Technical Education; including policies, laws, coding skills and how to incorporate drones into course work and curriculums. You will get "hands-on" training with Parrot Mini Drones, the Phantom 4 Pro+ Drone, and with the Gladius Underwater Drone.

## **On Course** (June 18 - 20)

Tim McRaith, WITC

### *Educators wanting to transcribe courses with WITC*

This course is designed to help you create greater success in work and in life. It will provide educators with empowering strategies for helping students become active, responsible, and successful learners who can prosper in a learner-centered environment. Gain proven strategies and activities to empower your students (any grade level) to want to learn and to apply what they are learning. Once completed you can teach Success Strategies to high school students who can earn transcribed credit with WITC to be applied as a general education elective to the program of their choice.

\*Must meet WITC Dual Credit Credentialing Requirements.

## **Building Bridges** (June 18 - 19 or June 18 - 21)

**\$200 STIPEND AVAILABLE TO FIRST 6 REGISTRANTS IN CESA 11/CESA 12 REGION**

Christy Roshell, WITC & Tom Klatt, Hudson High School

### *Administrators, MS & HS Principals, MS & HS Teachers, CTE Teachers*

Tours, tours and more tours! We will visit business sites in most of the Career Cluster areas - ranging from agriculture, health, manufacturing, public safety, and transportation. We will learn about the current/future needs of employers and what skills/education your students need to succeed. This learning community may be taken as a 2 or 4 day option.

## **Cybersecurity Essentials** (June 18 - 21)

**\$200 STIPEND AVAILABLE TO FIRST 6 REGISTRANTS IN CESA 11/CESA 12 REGION**

Greg Brodt, WITC

### *Technology Coordinators, Administrators, Business and Marketing Teachers, Tech. Ed Teachers*

The Cybersecurity Essentials course develops foundational understanding of cybersecurity and how it relates to information and network security. This course introduces participants to characteristics of cyber crime, security principles, technologies and procedures to defend networks. Through interactive, multimedia content, lab activities, and multi-industry case studies, participants will:

- Learn procedures to implement data confidentiality, integrity, availability and security controls on networks, servers and applications
- Understand security principles and how to develop security policies that comply with cybersecurity laws.
- Apply skills through practice, using labs and Cisco Packet Tracer activities
- Get immediate feedback on your work through built-in quizzes and tests
- Connect with the global Cisco Networking Academy community

## **Internet of Things** (June 18 - 21)

**\$200 STIPEND AVAILABLE TO FIRST 6 REGISTRANTS IN CESA 11/CESA 12 REGION**

Michael Miller, WITC

### *Business and Marketing Teachers, STEM Teachers, Tech. Ed. Teachers*

This course will introduce SmartHome, IoT, WiFi and home networking technologies in a hands-on, make it/take it format. Participants will work with wireless cameras, doorbells, security sensors and other consumer electronics. Raspberry Pi and Arduino computer kits will be supplied, which the participants will use to make their own projects. The participants will be able to take their kit home. Each activity is based on CISCO's Internet of Things curriculum. This CISCO curriculum is available, free of charge, for instructors to use in their classroom.
