Subject: OSA Newsflash: April 4, 2016 - DLM Testing Resumes

Good Morning, District Assessment Coordinators -

We received notification from DLM that they now have full bandwidth and no residual problems from the cable cut last week. Districts may resume DLM testing.

If you were testing a student when a disruption occurred last week, you should be able to log back in and complete the testlet.

Please let teachers and other members of your team know as needed.

If you continue to experience any problems with the DLM KITE system, please contact [Kristen Burton](#). We appreciate your patience and hard work.

Thank you,

Troy Couillard
Director, Office of Student Assessment
Department of Public Instruction
