

SFSP Focused Reviews and Technical Assistance

In lieu of completing onsite Summer Food Service Program (SFSP) reviews this summer, we are pleased to provide SFSP Technical Assistance (TA) phone calls. During this call, the DPI SFSP Team Consultants will review your SFSP Application and confirm your agency's procedures for providing meals, taking meal counts, compiling claims, documenting revenue and expenses and ensuring civil rights requirements are met. The call will also provide you with the opportunity to ask questions and receive tailored customer service regarding the operation of your SFSP this summer. As the USDA requires the State Agency to monitor and provide oversight for program integrity, the TA call is mandatory, however the call is not an audit or review. Corrective action will not be required, however if it is found that claims have been submitted in error, Fiscal Action may be assessed. Our goal is to assist you in running a successful program and ensure Programs maintain integrity while implementing the various flexibilities provided through the USDA waivers this summer.

We know you are busy and will make every effort to minimize the impact of TA phone call on your time while catering this experience to meet your needs.

The following sponsors will receive notification that they have been selected for a SFSP TA phone call in 2021. Note that sponsors **new** to SFSP in 2021 will receive a focused review, that includes an interview (call) and request for documentation. New sponsors that have completed this process or are currently being reviewed are not listed below.

Almond Bancroft School District	La Crosse School District
Ashwaubenon School District	Madison Metropolitan School District
