Re: Data Errata Letter for Athens

To Whom It May Concern:

This letter is to correct the Athens School District October 1 Count data for the 2019-20 school year. The Snapshot View for October 1, 2019 incorrectly lists only 30 students. The number should have been 58. I am sending a confidential list of students who were missed in the count. I understand that this adjustment may not impact the district's current designation of needing assistance. However, we want to ensure that the data set is accurate for the future.

Please alert me to any additional steps that may need to be taken.

Sincerely,

*Kelly Kapitz*
