December 5, 2022

I'm taking the time to do this as the DPI did not correctly download our 2021 TFS economically disadvantaged numbers for ARG purposes with their December 2021 snapshot. We had the correct numbers in Infinite Campus and I discussed this with Shay Morris at DPI.

The DPI has our 2021 TFS economically disadvantaged in grades K-3 at 64 of 121 students. Our actual 2021 TFS economically disadvantaged in grades K-3 was 75 of 122.

The number of economically disadvantaged students frequently changes throughout the school year. The DPI was first trying to tell me that the December snapshot captures the TFS data, which I argued was incorrect. It was eventually reported to me that I was correct.

I received the following from Britt Miller at DPI on November 16, 2022 at 8:00 a.m. *"I was corrected by the WISEdash team - the snapshot captures the most recent food service record submitted in WISEdata, not necessarily the record over the TFS date. So whatever food service data is submitted and current in WISEdata when the Snapshot happens on Dec 6th, it what will be captured and reported."*

I don't know why the DPI had to change the reporting method for AGR purposes, but they made it more difficult than easier. Hopefully they get it corrected for next year.

Very irritated and frustrated,

A handwritten signature in red ink, appearing to read "P. Schley", written over a horizontal line.
