Re: 2018 October 1st Child Count Errors for Fontana J8 School District

To Whom it May Concern:

The Fontana J8 School District is submitting this letter to correct students with disabilities enrollment data for the October 1st Child Count for October 1st, 2018. The data is being corrected because our special education records were not being submitted correctly as our special education students were not being reported as special education students within our system. We have since identified this issue within our student information system and have corrected it.

Our correct data for the October 1st Child Count would have 23 students with disabilities, 14 of whom are residents of the Fontana J8 School District territory and 9 who are not. We intend to let this letter inform both DPI and the general public via the DPI Data Errata Page our correct special education records for the 2018-2019 school year.

We apologize for the errors and any inconvenience this may cause in correcting it.

Nick Stolfe
Fontana J8 Registrar
