

ST. JOHN'S  
LUTHERAN

---

December 6, 2022

To DPI Customer Services Team:

We are continuing to work with our SIS vendor, FACTS, to resolve missing enrollment data in the WISEdata portal. We are aware of 15 current students that are not uploading from our SIS to WISEdata. Our 2022-2023 student enrollment currently is 310, not 301 as shown in WISEdata on the December 6, 2022 snapshot date. The 301 correctly shows a number of students that were enrolled at some point this school year, but have subsequently withdrawn. This enrollment discrepancy also throws off all other demographics including Economically Disadvantaged and Food Serviced data as well as attendance.

When FACTS resolves the problem, we will upload the complete data set. I do not have a time frame for this.

Sincerely,

Becky Besler
