Re: 2017-2018 Child Count Data Snapshot Error

To Whom It May Concern:

The Wisconsin Rapids Public School District is submitting this errata letter due to incorrect Child Count Snapshot data for the 2017-2018 school year. There were three students missing from the snapshot. These students all had existing IEP's that ended on 12/12/2017 and started again on 12/13/2017. Due to the status of the IEP's on 12/12/2017, these students did not get included in the snapshot. We are currently working with our software vendor to make sure this error does not occur again.

Our 2017-2018 Child Count Snapshot shows 730 students in WISEdash. Wisconsin Rapids Public Schools actually served 733 students on the Child Count October 1st, 2017 date. We appreciate your assistance in publishing this letter to reflect the correct data.

Sincerely,

A handwritten signature in cursive script that reads "Jean Westover".
