RE: Data Errata

This letter is to correct the special education data reported for the Fort Atkinson High School for the 2016-17 school year. The number of Students with Disabilities listed for the On-Track and Postsecondary Readiness Supplemental Data section (page 8 of the report card) is incorrect. The report card currently indicates 11 students with disabilities, which is what was listed in WISEdash. The data error was a result of our district needing to push the data from our Student Information System (PowerSchool) rather than our special education data system (SEEDs) due to the date of our district adopting the special education data system. The correct number of Students with Disabilities listed for the On-Track and Postsecondary Readiness Supplemental Data section should be 24. We had 24 students with disabilities in the 2016-17 graduating cohort.

This correction will not change the 2017-18 report card for the high school since the inquiry period has passed however it will affect the Closing Graduation Gaps information (page 6) which reflects longitudinal data. We also want to ensure that the information on the 2018-19 report card reflects the correct number of students with disabilities as well as the corresponding School Target Group Graduation Rates so that there is a proper comparison across the years that this data is on the report card.

Please accept this letter as notification of this error. Thank you for your time and assistance with this matter.

Sincerely,

A handwritten signature in cursive script that reads "Lisa Hollenberger".
