

June 16th, 2022

Wisconsin Department of Public Instruction

DPI Customer Service Team,

Rocketship Public Schools was aware at the time of the Spring Snapshot in May 2022, that there were a few unresolved errors involving School Food Service program association and one overlapping enrollment error.

After further review of our PowerSchool instance, we were able to identify that the School Food Service program association was not publishing and transmitting to WISEdata properly. However after the Spring Snapshot Day in May 2022, we have since resolved the errors.

Additionally, the overlapping enrollment error that was captured involves a student who had been enrolled at another school and was attending both schools during the same period. We engaged both the LEA involved and DPI regarding this error. This error has been resolved since then as well.

Please contact me if you have any questions or need further clarification.
