# Snapshot

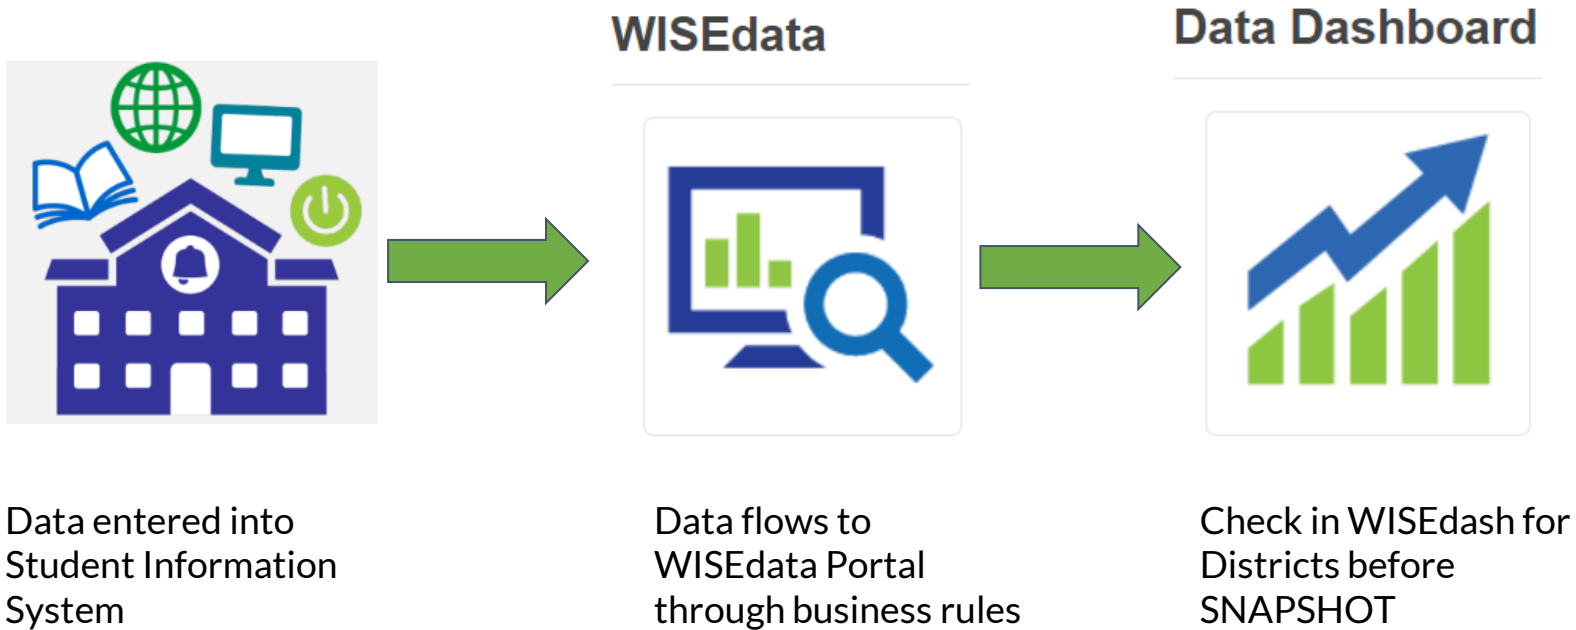

## December 5, 2023, is the Snapshot for all 22.23 SY CTE and Career Education Data

- The Snapshot begins at the start of the business day on December 5, 2023.
- All CTE and Career Education data should be accurate in WISEdash for District before December 4, 2023. If you see it in WISEdash the day before the Snapshot, you know that the data has been sent.
- It takes time for the data to flow from your Student Information System (SIS) to WISEdata Portal and into WISEdash for District. At least 24 hours for the entire process.
- When the entire state is submitting data at the same time, the server gets slow.
- Changing data in your SIS does not automatically flow to WISE. Only new data automatically flows. Changed data calls for a resync from your SIS.

# CTE Data Team

- Submitting accurate data to WISE takes a team!
- Divide and conquer:
  - Identify who checks WISEdata Portal?
    - Certified/Non-Certified Export
    - Participants Export
    - Concentrators Export
    - Roster: Course Offerings Export
  - Identify who checks WISEdash for Districts
    - Snapshot > Career Education and Courses
    - Snapshot > Perkins
