RE: Correction to Data

The Kaukauna Area School District has been alerted to an error that is being reported on the DPI website regarding teacher salaries for 2009-2010. According to documentation under the data/teacher data tab, the high salary amount for teachers in the Kaukauna Area School District for 2009-2010 was \$96,465. This number is incorrect. The actual high salary level for teachers for 2009-2010 in the district was \$77,778. Please change the data, if possible.

The district fully understands that this data is generated from the PI-1202 report and it was an error on behalf of KASD. Because the number is skewed the district would appreciate a correction.
