Career Readiness Community of Practice

(formerly the ACP Community of Practice)

2021-22 Theme:
Creating a Culture of Career Readiness

In this year's virtual Career Readiness Community of Practice* we will dive more deeply into creating a CULTURE of career readiness for your school district. Each month we'll focus on developing a career readiness culture from a different angle. Participate only during the months that feature the topics you need! Here's what you can expect every month:

- Expertise with leaders or peers who will share their experiences and strategies

- Breakout room discussion where you can further explore the topic with other school districts and brainstorm challenges together
All sessions will be recorded so you can participate synchronously or asynchronously. Breakout rooms only available for live participants.

Give students what they need for success – instruction that puts them on a path for career readiness!

- When students choose courses that align to their career interests, their **sense of belonging and engagement** in learning increases.

- Career exploration helps students find the **relevance** in their classes and increases **academic motivation**. These are ESSENTIAL when learning takes place remotely.

- Students have access to the **guidance and support** they need when they need it. We must make sure ALL students have a plan for success after high school.

- Students are **better equipped to succeed**, even in a recession when opportunities become more scarce.
