CESA 2 Educator Effectiveness Survey Summary August, 2023

Introduction

The Department of Public Instruction administered a survey to all Wisconsin public school districts and independent charter schools to assess the implementation of the six required elements of the Wisconsin Educator Effectiveness (EE) System, regardless of the evaluation model used. DPI asked that only one respondent from each district complete the required survey. The survey was administered between May 19, 2023 and June 16, 2023. Cooperative Education Service Agency (CESA) staff who support EE implementation in school districts were asked to remind districts in their region to respond.

The survey covers the six requirements of the EE System, including:

1. Orientation and training for educators and evaluators.
2. Evaluator training and ongoing monitoring of inter-rater agreement.
3. Educators completing a self-review during the EE Cycle
4. Educators completing at least one student or school learning objective (SLO) annually.
5. Evaluators conducting required EE conferences.
6. Evaluators conducting observations of professional practice during the EE evaluation cycle.

The following summary presents the response rates for CESA 2 (and statewide for context) along with a summary of survey responses. For each survey question, if the difference between the CESA 2 responses and statewide responses are greater than 10%, those results are bolded. The conclusion addresses findings related to implementation of the six EE requirements in the CESA 2 region.

Response rate

CESA 2 supports 74 school districts and 6 independent and non-instrumentality charter schools. Of the 80 entities, 42 responded to the survey for a **52%** response rate. Statewide the survey response rate is **69%**.

Summary of Results

Based on CESA 2 survey responses, the following conclusions can be made for each of the six EE requirements. One limitation to consider is that surveys were completed by one individual in each district. Depending on this respondent’s role in the district and level of interaction with different schools in the district, their knowledge and understanding of EE practices in each school may vary. Another potential limitation is the possibility that respondents may have “inflated” their responses to appear more in line with DPI requirements, even though the survey was anonymous (other than identifying which CESA the respondent is located in). Finally, another consideration, the wording of questions related to principals (for example, question number 18) uses teacher process language and may have caused confusion for respondents.

Orientation and Training for Educators and Evaluators

Most respondents reported that they provide an orientation (98%) and ongoing training opportunities (95%) for their staff. The most frequently reported resources include: online resources, written resources, and the process manual.

Evaluator training and ongoing monitoring of inter-rater agreement

The majority of evaluators have been trained (98%) and most, although a smaller percentage (88%), also participate in calibration activities.

Educators must complete a self-review during the EE Cycle

Nearly all (100%) teachers and principals complete a self-review and the majority (63%) of teachers complete it annually.

Educators must complete at least one student or school learning objective (SLO) annually.

Almost all (98%) teachers complete an SLO annually and most principals (93%) complete an SLO annually. Ninety-five percent of teachers and principals receive a holistic evaluation of their SLOs at the conclusion of their evaluation cycle.

Evaluators must conduct required EE conferences.

All teachers and principals are evaluated in their first year of employment and all teachers and principals are evaluated at least every third year after their first year of employment.

Teachers are most frequently evaluated every third year (72%) or it was reported districts have a combination of approaches to frequency - annually, every other year, every third year (18%). Principals are also most frequently evaluated every third year (38%), followed by annually (33%).

A large percent of teachers met with their evaluators for their planning session (85%), mid-year review (77%), and end-of-cycle conference (97%). Similar percentages of principals attended conferences with their evaluator: planning session (85%), mid-year review (80%), and end-of-cycle conference (97%).

Evaluators must conduct observations of professional practice during the EE evaluation cycle.

Teachers in their evaluation cycle most frequently receive an announced, formal observation with a pre- and post-conference (33%). This was followed by a series of mini observations without pre- and post-conferences (18%) and a series of mini observations with a post-conference (15%).

Reported principal observations were similar to teachers. The most frequent was an announced, formal observation with a pre- and post-conferences (29%), followed by a series of mini observations without pre- and post-conferences (18%), and a series of mini observations with a post-observation (17%).
