

# Interactive Word Walls

## Wisconsin State Standards Strand

Language

- Vocabulary Acquisition and use

## Grade Level

K-5

## Purpose

Use with students to support acquisition of new vocabulary words

## When to Use

Before Reading  
During Reading  
After Reading

## Grouping

Whole Group  
Small Group  
Partners  
Individuals

## ABOUT THE INSTRUCTIONAL PRACTICE

INTERACTIVE WORD WALLS create print rich learning environments. They provide students with a visual cue of the vocabulary words they are learning. There are a variety of formats for interactive word walls: sight words organized by alphabet, unit-specific words, new vocabulary words, word parts, for example. Educators should choose the format of the interactive word wall that is most appropriate for the needs of their classroom and should regularly engage the word wall in learning by updating the words and using it as a cue to remind students to use their vocabulary words in their learning.

## IMPLEMENTATION OF THE INSTRUCTIONAL PRACTICE

- Create the word wall where every student can see it.
- Use large black letters and a variety of background colors to distinguish easily confused words.
- Engage students to determine which words should go on the word wall. Try to include words that children use most commonly in their writing.
- Add words gradually — a general guideline is five words per week.
- Use the word wall daily to practice words, incorporating a variety of activities such as chanting, snapping, cheering, clapping, tracing, word guessing games as well as writing them.
- Provide enough practice so that words are read and spelled automatically and transfer in students' daily writing.
- Add new words on a regular basis.
- Use content-area material from the curriculum rather than randomly selected words.
- Refer to the word walls regularly, so students understand its relevance.
