

Wisconsin's Leader for Online and Digital Learning

The Wisconsin Digital Learning Collaborative (WDLC) is committed to empowering educators and developing partnerships to provide the best professional learning experiences possible. The WDLC partnership provides educational institutions throughout Wisconsin with digital learning tools, resources, and support for professional learning that meets their needs. The WDLC is not a vendor and the goal of the organization is to enable educational partners to grow locally. Professional learning is at the discretion of each education partner. The WDLC has a role to provide equitable access and quality solutions to provide resources, access and support for each partner's efforts. This includes providing an environment for CESAs, districts, schools and other educational organizations in Wisconsin to deliver online and blended learning to their respective audiences via an online platform to be used as they see fit.

Resources

Build your own professional learning resources, choose from resources made available to you, or any combination of both. We've made it easy to build content, audio and video, even integrate Google documents.

- Full online PD courses through INTEL
- Other WDLC PD courses with facilitators
- Teacher/Facilitator Boot Camp Resources for Understanding & Using Infrastructure

Tools

Many of the available professional learning tools mirror the tools used with K-12 students and in some cases can be embedded into the existing tools that are already used on a daily basis.

- LMS
- Content Management and User Portal
- Desktop Conferencing Software
- Professional Learning Communities

Support

Educational institution leaders don't need to be experts in digital learning and they don't need to recreate wheel to set themselves apart. Partners will find resources and opportunities to collaborate to help you succeed.

- Monthly One-on-One Meetings During Start Up
- Boot Camp Online Course Modules
- Ticketing System
- Subsidized and Shared Costs
