

CAN YOU FIND A MYSTREE?

Different kinds of trees grow in different ways.

Can you find trees that match these mystery tree silhouettes?

- ① Take a hike with a grown-up.
- ② When you see a tree with a matching silhouette, make the American Sign Language sign for “tree” and point to the tree silhouette on this page.

Make a “tree” with your hand and twist it twice.

Can your grown-up find the matching tree in the park? Take turns!

pine

weeping willow

elm

maple

cedar

oak

ash

spruce

spruce

Follow the trees home

- ① Find a grown-up and head off down the trail.
- ② As you walk, point out odd-shaped trees, big trees and interesting bark.
- ③ After a while, turn around and walk back to where you started. While on the way back, try to point out all the same trees.

Paying attention to the strange shapes of trees can help you stay on the right trail!
