Category: Data Errata – Economically Disadvantaged 2020-21 School Year
RE: 2020-21 Misreported Data

To Whom It May Concern:

For the Northwood School District, the data for economically disadvantaged students was not correctly submitted. This may be due to a mapping error in our Ed-Fi Code setting during configuration of our student information system (Infinite Campus). According to Infinite Campus, this setting can be easily overlooked by school districts when mapping data. Although we use other data sources to monitor the students that qualify for free and reduced meals, the mapping error in Infinite Campus was not noticed until recently.

WISEdash shows only 10 students in the 2020-21 school year as being identified as “Economically Disadvantaged” within our entire district population. The correct data is shown below from the Friday, September 18th, 2020 count reported from Infinite Campus. See attached report that was used to determine this data.

168 Total Students Identified as Economically Disadvantaged:
154 Students Identified as Free Eligibility
14 Students Identified as Reduced Eligibility

Out of our total students enrollment, 168 students should be identified and correctly reported as “Economically Disadvantaged”.

Please accept this letter as official notification of the error of data. The mapping in Infinite Campus will be monitored moving forward into future school years.

Sincerely,

Scot Kelly - Northwood School District Superintendent
