Re: 2024-2025 School Year

During the review of the December 2024 Snapshot report, we noted that some errors came to our attention. As part of our commitment to transparency and accuracy, we believe it is essential to promptly address any discrepancies discovered.

After conducting a comprehensive review, we have discovered that 14 students were unaccounted for in the December snapshot as CTE concentrators. The snapshot has recorded only 11 CTE concentrators when, in fact, we have 28 CTE concentrators. In addition, our CTE participant count was recorded as 37 students when, in fact, we had 135 CTE students. Our downloads and data from the day prior to the snapshot showed the correct information in WISE Data. We did not push any updates after that download that would have changed the numbers. Upon investigation with our SIS it seems that the new Skyward Qmlativ system did not pull the CTE courses and students correctly on snapshot day, even though we had fixed all our errors previously. The courses were not identified as CTE courses and therefore the students were not designated as CTE students or concentrators. We are working with our SIS vendor and the CESA 10 CTE team and have been working with them throughout the year. We have had multiple instances where the data was correct and incorrect the following day. We are continuing to work with Skyward on this issue.

December snapshot reported 11 CTE concentrators.
