December 17th, 2025

Wisconsin Department of Public Instruction,

RE: 2024-2025 Misreported Student Data

During preparation for the December 9th, 2025 snapshot, I was in contact on multiple occasions with our SIS about the system not working properly for me to enter CTE Concentrators and IAC codes. I started contacting their support department three weeks prior to the snapshot for help. They did an online chat and screen share with me and also viewed our database. They eventually escalated the case to someone else higher up to help. Unfortunately, the matter was not resolved until one week after the snapshot. Once it was resolved, I was able to update our CTE Contractors and IAC codes. I immediately did that and re-sent the data to the state. However, I'm afraid now after the snapshot, our data in those fields will not be accurate. I was trying to get it remedied prior to the deadline date, but PowerSchool support kept telling me they were actively working on a fix for the issue. They finally fixed the issue on December 16th, 2025, one week after the snapshot. As soon as it was fixed, I entered the rest of the data in our SIS and immediately re-sent the data to the state. I just wanted to make you aware of the data inaccuracy in our CTE data due to this issue. Please accept my apologies and this letter as official notification of the data error.

Sincerely,

Kimberly M. Drager

District Registrar
