May 5th, 2025

Dear DPI,

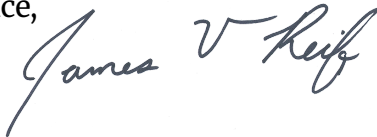

We are taking time AGAIN a letter in 2025, like we had to in 2022 & 2024 as the DPI did not correctly download our 2024 TFS economically disadvantaged numbers for AGR purposes with the December 2024 snapshot. We had the correct numbers in Infinite Campus. We have had the same issue previously and have brought it to your attention.

The DPI has our 2024 TFS economically disadvantaged students in grades K-3 at 0
Our actual 2024 TFS economically disadvantaged students in grades K-3 was 46
Our economically disadvantaged in the Elementary was 63, the MS was 17 and the HS was 50.

The number of students who are economically disadvantaged frequently changes throughout the school year, as they typically have less stable living conditions. The DPI using just the December snapshot data is not an accurate representation of our data.

I don't know why the DPI had to change the reporting method for AGR purposes, but I hope that you can work with Infinite Campus to solve these issues. It is a significant waste of time on the schools' end to spend on something that is not our issue. Time would could spend focused on student growth.

In Service,

James V Reif
New Auburn Superintendent and High School Principal
