RE: 2024-2025 Misreported Student Data

After conducting a comprehensive review, we discovered that some of our Choice students were not properly marked as such in our Student Information System (SIS). This occurred during our transition to a new SIS provider, where an automated process from our previous system that marked these students was not carried over to the new system. This resulted in not all Choice students being accurately reflected in the December 2024 Snapshot. While WISEdata shows 1,530 choice students reported during the Snapshot, the OAS system correctly identified 2,013 students as choice students, a difference of 483 students. The total enrollment for both choice and non-choice students was listed at 2,173 in both WISEdata and the OAS system. The error has since been fixed and should be correct in all future snapshots.

Please accept this letter as official notification of the data error.

Sincerely,

A handwritten signature in cursive script that reads 'Abby Andrietsch'.

Abby Andrietsch, Chief Executive Officer
