

**Date:** February 25, 2026

**To:** Wisconsin Department of Public Instruction

**Re:** WISEdata Snapshot – Data Errata Submission (December 10, 2025)

Dear DPI WISEdata Team,

Thank you for your communication regarding the preliminary WISEdata quality checks for the December 10, 2025 snapshot.

At the time of the snapshot, Living Word Lutheran High School inadvertently showed an errant figure of zero Choice Participant Enrollments for the 2025–2026 school year. We acknowledge this discrepancy and have reviewed our data reliability with SIS provider. On that date, we did, in fact have 134 total Choice Participant Enrollments on December 10, 2025 broken down as follows: WPCP- 84 and MP-50.

**Explanation of Issue:**

To our knowledge, the data was submitted correctly and we were unaware of any errors. We have since brought this issue to the attention of our SIS provider and are working toward the solution.

**Corrective Actions Taken:**

- Verified all Choice student eligibility and enrollment records
- Implemented an internal data review checkpoint prior to future snapshot windows

**Current Status:**

We are actively working toward resolving the issue with our SIS provider. Living Word Lutheran High School will continue to monitor data quality closely to ensure accurate reporting in future submissions.

Please let us know if any additional information or documentation is needed. Thank you for your partnership in maintaining accurate reporting.

Sincerely,

David Miskimen  
Executive Director  
Living Word Lutheran High School
