Health Profession Settings

There are many types of settings where patient care can be delivered. Not all professions will be found in every setting. Some professions require experience gained in one setting in order to obtain employment in other setting.

- Acute-care hospitals
- Primary Care Clinics
- Urgent-care centers
- Long-term care facilities, such as nursing homes and skilled nursing facilities
- Outpatient or ambulatory clinics
- Emergency medical services (e.g., ambulance services, medflight transport)
- Private Practice
- Retail
- Home healthcare (i.e., care provided at home by professional healthcare providers)
- Specific sites within non-healthcare settings where healthcare is routinely delivered (e.g., a medical clinic embedded within a workplace or school)
- Community-based residential facilities
- Military and combat facilities
- Hospice
- Corrections
