Data Collection Tool

- DPI has developed a Qualtrics survey as the tool for collecting data required under Act 185 (i.e., the “Act 185 Survey”)
- Survey was recently sent to all school district administrators
- Survey includes additional questions intended to provide context for school district responses to the required data elements
- Gathering this contextual information will help provide a more comprehensive picture of the impacts of school closures resulting from the COVID-19 pandemic public health emergency
