

PERCENTAGE CONSONANTS CORRECT (PCC) IMITATIVE SENTENCE SCORING FORM

Student/Child: _____ Date of Birth: ____/____/____

PCC Probe Date: ____/____/____ SLP: _____

The abbreviated procedures below are based on the recommendations of Johnson, Weston, and Bain (2004) and Shriberg and Kwiatkowski (1982):

1. Imitative samples of 36 sentences with appropriate mean length utterance (MLU) for the student's age should be used. Present sentences using a conversational tone without exaggerated prosodic cues (Johnson, Weston and Bain 2004).
2. Mark errors directly on the list of sentences for efficient scoring. Only consonants are scored, not vowels (i.e., only the consonantal /r/ is scored).
3. Score only the first production of a consonant if a syllable is repeated (e.g., ba-balloon). Score only the first /b/.
4. Do not score consonants if a word is unintelligible or only partially intelligible.
5. Errors include substitutions, deletions, distortions, and additions. Voicing errors are only scored for consonants in the initial position of words.
6. If /ng/ is replaced with /n/ at the end of a word, do not score it as an error. Likewise, minor sound changes due to informal speech and/or selection of sounds in unstressed syllables are not scored as errors.
7. Dialectal variations are not scored as errors.
8. To determine the PCC value count the total number of consonant errors and use the formula below.
