Education behavior Improvement

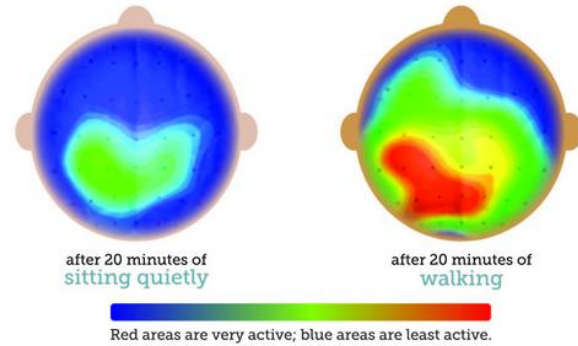

- Attendance
- Dropout rates
- Behavioral problems at school

Students' cognitive skills and attitudes Improvement

- Concentration
- Memory
- Mood

physically active kids have more active brains

BRAIN SCANS OF STUDENTS TAKING A TEST:

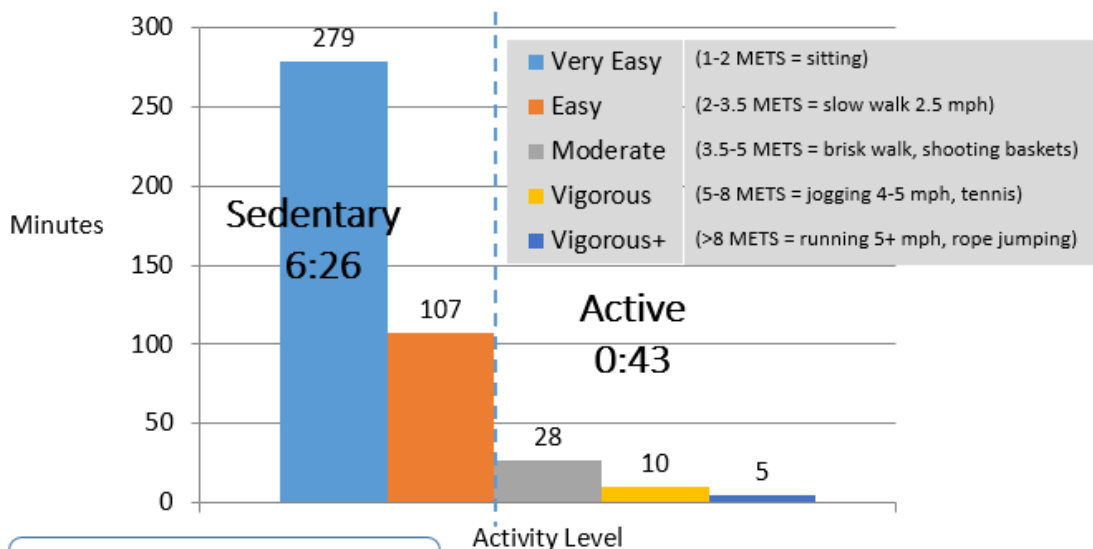

Centers of Disease Control: 2014 Health and Academic Achievement Report based on their review of 50 separate studies

Recommendation: Students should get at least 60 minutes of physical activity per day.
(Centers of Disease Control and Prevention & The American Academy of Pediatrics)

Active Schools Core 4+ Strategies

1. **Active Physical Education** – Students are active the majority of class.
 2. **Active Classrooms** – Regular classrooms have routine, active brain breaks.
 3. **Active Recess / Open Gym** – Students have structured activity time.
 4. **Active Before and After School** – Facilities are available for all students.
- + **Family and Community Physical Activity** – Students have opportunities to be active outside of school.

A Lot of Sedentary Time

Wisconsin
study indicated
students were
sitting for
over six
school day.
