The purpose of the Essential Components of Physical Education district survey is to conduct an assessment of the district’s physical education and physical activity programming. At the core of this assessment is quality physical education taught by a certified teacher. The district can use this assessment to evaluate strengths and weaknesses and develop and implement a plan for improvement.

The survey has nine components totaling 33 questions and should take approximately one hour to complete. You will be contacted within a month of the submission deadline date with a score.

The survey is NOT a district requirement and is intended for the purposes of improving physical education and physical activity programming. The Department of Public Instruction will provide technical assistance at the request of the district.
