

Bloodborne Pathogens School Training

Target Audience: School Nurses, Teachers, Paraeducators, Secretaries, Administrators, School First Aid Responders, Other School Staff

Time Needed to Complete Module: 20 minutes

This training module may be used by school district personnel for bloodborne pathogen (BBP) training. A district BBP knowledgeable person must be available for staff members to ask questions of during the time that they are taking the training. The school district must also notify the employee of where to find a copy of the district's BBP plan and of any district specific procedures.

Click on the **Enter Program** button above or below to enter the module or paste the following web address into your web browser:
