NOTICES:

Hello everyone, I want to thank Dawn Sebranek and Freddi Adelson, who have been covering for me while I have been recovering from my planned knee surgery. I am returning to work this week to a schedule of very limited hours for the next month, and hope that I will be able to answer your emails and messages in a timely manner—please be patient. If there is something that is urgent, please call our department team line at 608-266-8960 and someone will help you get an answer.

Last week, I was once again reminded of the enthusiasm that new school nurses bring to our profession—DPI and WASN partnered to offer the New School Nurse Training and an amazing 59 new school nurses attended! They were eager in their enthusiasm to keep our school kids safe and healthy. I want to thank all of the wonderful speakers: Cindy Vandenbarg, Kimberly; Louise Wilson, Beaver Dam; Nic Dibble, DPI; Isa Chase, Franklin; Sally Roepe, Wauwatosa; Rachel Gallagher, Madison; Marla Blom, West Allis/Milwaukee; Lanaya Ballou, Beloit; Anne Faulkes, Epilepsy Foundation; and Teresa DuChateau, WPHA.

I hope that you will find time to take a look at the many offerings available in this update!

Bette Carr, MSN, RN, NCSN, WI DPI School Nurse Consultant bette.carr@dpi.wi.gov

PROFESSIONAL DEVELOPMENT

2015 Food Allergy Conference
Sponsored by FARE and Children’s Hospital of Wisconsin
Located in the CHW-Auditorium
8915 W. Connell Court, Milwaukee, WI
Saturday, November 14th
Time: 8 a.m. - 4 p.m.
Cost: $10 (must register in advance-no refunds)

Cathy Owens R.N., M.Ed., NCSN, ERSN, Lead Credentialed School Nurse, Murrieta Valley Unified School District in California will be presenting from the school nurses’ perspective. She will be speaking on the CDC’s Voluntary Guidelines for Managing Food Allergies in School, giving tips from her experience and sharing her personal story of saving a child’s life with epinephrine.

Dr. Jeanne Herzog, PhD, from Summit Psychology Clinic will be presenting on the topic of Food Allergy Bullying and explaining what it is, giving tips on what to do if it’s happening, and creating an atmosphere to help prevent it.

Questions can be directed to foodallergyconferenceWI@gmail.com
Register at 2015foodallergyconferencewi.eventbrite.com

Building the Heart of Successful Schools Conference  
Kalihari in Wisconsin Dells  
Pre-conference December 2nd, 2015  
Conference December 3rd & 4th, 2015

The conference brochure has descriptions of the pre-conference, the 24 sectional breakout choices and our exciting keynote speakers! Come see Joyce James’ opening keynote presentation on “The Racial Equity Lens: the Racial Divide in Education.” Ms. James focuses on “turning the mirror inward” to help well-intension educators see what they can do to improve their engagement with students from all backgrounds. Closing keynote speaker, Dr. Adolph Brown, III presents on “ZAP the Gap! Closing the TRUST (Achievement) Gap.” This engaging and motivational session will give attendees insights and techniques to motivate at-risk learners.

Registration is located at: http://sspw.dpi.wi.gov/sspw_buildingheart.

Infectious Disease Update—UW Madison School of Nursing
December 4-5, Wisconsin Dells
(see attached flyer)

RESOURCES
Wisconsin Immunization Program Update
October 1, 2015

Staffing
There have been a few changes that we wanted to make you aware of, as there is a possibility for confusion…

Stephanie Smiley is the new Bureau Director for the Bureau of Communicable Diseases (which the immunization program resides in). She has been with the State Department of Health Services (DHS)
for 15 years, and most recently served as the DHS Communications Director before joining the Division of Public Health.

Stephanie Schauer was recently named the new Immunization Program manager, replacing Dan Hopfensperger after his retirement in June. She previously held the Field Unit Supervisor within the Wisconsin Immunization Program (and will continue to serve in that role as well until a replacement can be hired).

And lastly, while not a new face nor in a new role, just a reminder that there is another Stephanie in the program- Stephanie Borchardt, who works on adult immunization activities as well as perinatal Hepatitis B and pandemic preparedness!

Programmatic Activities

Influenza Policy and Procedures: The updated influenza policy and procedure document (for both inactivated and live attenuated vaccines) for local health departments and tribes is available on the Wisconsin Immunization Sharepoint site with the rest of the Policy and Procedure manual.

HPV grant: DPH received a supplemental grant in 2014 to work on improving HPV rates in adolescents and has received a one year extension to continue this work. Grant related activities include:

- Work with a social marketing firm to do HPV related messaging. We are focusing on the digital market and using CDC materials such “Closing the Door to Cancer”, and Jackie’s story (see http://www2c.cdc.gov/podcasts/player.asp?f=8630171. These will be placed on YouTube, search engines, and social media such as Pandora. We anticipate these starting mid-October.
- Kailynn Mitchell and Taylor Larson were hired in June to conduct the CDC quality improvement program called Assessment, Feedback, Incentive eXchange (AFIX) with health care providers/organizations with an emphasis on increasing HPV rates. They are doing site visits statewide and if you are aware of a health care practice that would be interested in participating, please send an email to kailynn.mitchell@wi.gov or taylor.larson@wi.gov .
- $80,000 was granted to immunization coalitions in Wisconsin for activities to increase HPV rates and awareness. Such activities include social marketing (movie trailers and billboards) and learning sessions for health care providers. A second round of funding for coalitions will be made available in the second year.
- Reminder/recall postcard mailing: For the first round - of the 825 postcards sent to 11 through 12 year olds and were received, 176 (21.3%) have completed the HPV series since 6/30/2015! A second round was sent out in early September and we are still awaiting the results.
- And in case you haven’t seen it, DPH has an HPV web page: https://www.dhs.wisconsin.gov/immunization/hpv.htm

Adult Immunization: The Wisconsin Immunization Program has been awarded a two year grant from CDC to collaborate with partners (e.g., health care providers, pharmacists/pharmacies, LHDs, tribes, and immunization coalitions) to increase adult immunization rates in Wisconsin. As part of this grant the Immunization Program will work with health care providers to increase the routine clinical practice of assessing which vaccines are needed for adult patients, improve and expand health care providers’ recommendation for needed adult vaccines among their adult patients, improve the ability for healthcare providers to administer needed vaccines or to refer the patient to a health care
provider who can administer these needed vaccines, and improve entry of vaccine doses administered to adults into the Wisconsin Immunization Registry (WIR).

**WIR**

The Wisconsin Immunization Program has been awarded a two year grant through the CDC to modify existing WIR functionality to appropriately align with requirements of the Assessment, Feedback, Incentives and eXchange (AFIX) program. Funding will also be used to provide training and technical assistance to providers to help improve the quality of data they are submitting to the WIR and to ensure they are appropriately managing their patient’s status in the WIR. In addition, grant funds will support the development and offering of trainings for health care providers on how to run assessment reports in the WIR to routinely measure their pediatric and adolescent immunization coverage levels.

**VPD Surveillance**

**Mumps:** There have been a total of six confirmed cases of mumps in individuals who attend the University of Wisconsin, Whitewater. Onsets of parotitis range between 9/18 and 9/27; all have been confirmed by PCR. Investigation and control efforts are ongoing and more information will be forthcoming.

Please keep in mind that PCR is the preferred diagnostic specimen for mumps, and the recommended specimen to collect is a buccal swab, which should be collected as soon as possible (preferably within 3 days of parotitis onset and not after 9 days of parotitis onset) for the best chance of detection of virus. Since some individuals with parotitis have negative tests for mumps, but positive tests for influenza viruses, nasopharyngeal specimens should also be submitted to WSLH for influenza PCR testing. Additional information can be found in the memo dated January 20, 2015 available on the DPH website at: [https://www.dhs.wisconsin.gov/immunization/mumps.htm](https://www.dhs.wisconsin.gov/immunization/mumps.htm). It is the first item under the tab “For Health Professionals.” Also, please notify the local health department upon suspicion of disease.

**Pertussis:** The latest pertussis report is posted on the DPH website at: [https://www.dhs.wisconsin.gov/immunization/pertussis.htm](https://www.dhs.wisconsin.gov/immunization/pertussis.htm)

**Parapertussis (Bordetella parapertussis) public health recommendations:** DPH’s recommendations for the follow up of parapertussis cases have been updated to include some more recent information on parapertussis, including information learned during the 2011-2012 outbreak in Wisconsin. Please note that the recommendations for treatment, prophylaxis, and isolation/exclusion have not changed. The findings from the 2011-2012 outbreak provided support for the recommendations already in use. For a copy of the article describing the 2011-2012 outbreak or if you have any questions, please contact Ruth Koepke (Ruth.Koepke@wi.gov or 608-266-9783).

The updated recommendations can be found on the pertussis website. Click on the link for “Parapertussis (Bordetella parapertussis)” Alternatively, the recommendations can be accessed directly by clicking on this link: [https://www.dhs.wisconsin.gov/publications/p01108.pdf](https://www.dhs.wisconsin.gov/publications/p01108.pdf)

**Funding Opportunities**

NACCHO has again received funding from the Centers for Disease Control and Prevention (CDC) to support LHDs to engage and collaborate with healthcare providers and other key community
stakeholders in immunization, adolescent health, and cancer control to increase HPV vaccination rates in their communities. To advance this goal, NACCHO released a Request for Applications (RFA) to identify a second cohort of LHDs to participate in a NACCHO-led action planning process to identify steps to increase local HPV vaccination rates. To review the RFA, click here. Applications are due October 29, 2015 by 5:00 PM EDT.

Publications

Pertussis: Siblings are often the source of infection for infants

- According to a recent study from the CDC, siblings have surpassed mothers as the most common source of pertussis infection for infants. The increasing role of siblings in the spread of pertussis to infants is attributed to waning protection from acellular pertussis vaccines (like DTaP, which was introduced during the 1990s) and the subsequent increase in pertussis occurrence among children who have only received acellular vaccines.

- The best available method for preventing pertussis among young infants is to vaccinate pregnant women with Tdap during every pregnancy, preferably between 27-36 weeks gestation. By vaccinating women during pregnancy, the mother develops anti-pertussis antibodies which are transferred across the placenta to the fetus. The infant is then born with the mother’s antibodies. These antibodies provide the infant with some protection from pertussis until the infant him/herself can be vaccinated.

- All other family members and potential contacts for the infant (siblings, parents, grandparents, caregivers) should be brought up-to-date with DTaP or Tdap vaccines at least two weeks before the child is born or as soon as possible after the child is born. This is known as the cocooning strategy.

"That the culture care needs of people in the world will be met by nurses prepared in transcultural nursing."
Madeleine Leininger
Barbara Nichols DNSc (hon) MS, RN, FAAN has vast experience in executive leadership and international initiatives. Her professional career spans four decades in leadership and policy making positions in professional associations and related health organizations. Throughout her career she has been a solid champion for the need to value diversity in all of its forms and a leading advocate for ethnic minority inclusion in all aspects of the health professions.

**TITLE:** **Advocating for Diversity and inclusivity in the Wisconsin Nursing Workforce**

**Objectives:**
- Discuss racial and ethnic trends that impact diversity and inclusivity in the nursing workforce.
- Identify successful strategies for cultivating nursing diversity.
- Promote building system infrastructures to strengthen diversity and inclusivity capacity.

Dr. Mel Freitag is currently the Director of Diversity Initiatives and an Assistant Clinical Professor in the School of Nursing at University of Wisconsin-Madison. Her PhD is in Curriculum and Instruction with minors in Rhetoric/Composition and Educational Psychology. She also holds a Master of Arts in English from Illinois State University and a Bachelor of Arts in English from Augsburg College. Her dissertation was titled “Safety in Spaces: A School’s Story of Identity and Community,” and explored how students’ and teachers’ voices and stories shaped how and what it means to be a welcoming, supportive, and safe(r) school for all students, faculty, and staff. In her current role in the School of Nursing, Dr. Freitag continues to serve historically underrepresented populations through mentorship, recruitment, student programs, curriculum initiatives, and faculty/staff professional development.

She lives on the bustling east side of Madison, Wisconsin with her partner Amber, their 1 year old daughter Bennett, their two curious cats, and one adventurous dog. She loves exercising, riding her bike, watching indie films, traveling, and of course, writing.

**Session Description:**

What is culturally congruent care? How do you own privileges and disadvantages impact your health care belief system, values, and patient-centered care? This interactive session will explore how your own intersections of race, ethnicity, gender expression, socioeconomic status, sexual orientation, religion, and age impact patients whose identities are different from your own. Discussion will be based on how social determinants of health (housing, unemployment, poverty, educational level, etc) and health care systems influence patients’ health. It will also take into account the health care professionals’ role in achieving health equity and social justice for all.

- Define “cultural competency,” “cultural relevancy,” and other models of health equity.
- Identify social identities of power and their relation to social justice in health.
- Articulate systems of oppression, specifically how they operate in the state of Wisconsin (race to equity report).
- Describe “diversity dialogues” and how that can be implemented.
- Explore what it means to work WITH communities instead of FOR.
- Engage with action steps for allyship.
- Understand how to be a critically reflective practitioner.
- Create your own social justice action plan.
- Reflect on your own implicit biases and how that “plays out” in your practice.
Dr. Krau is an Associate Professor at Vanderbilt University School of Nursing teaching in the doctorate program, in courses that focus on Nursing Education and Pharmacology. He is also a consultant for Middle Tennessee School of Anesthesia faculty development and student enhancement, and the Consulting Editor for Nursing Clinics of North America. He identifies himself as critical care nurse with particular interests in end of life issues in critical care, pharmacogenetics, and the use of technology in critical care. Among his 50 publications is the first protocol for weaning patients from an intra-aortic balloon pump, that has been adopted in many hospitals, and a series of articles on the importance of cytochrome p450 for any nurse that prescribes or administers medication.

Objectives:
Upon completion of the presentation, the learner will be able to:
♦ Examine the impact of cytochrome p450 on drug metabolism.
♦ Explain why the same drugs do not work the same on everyone.
♦ Summarize disparities in clinical drug trials.
♦ Evaluate cultural factors that influence pharmacokinetics.

Shiva Bidar-Sielaff has a Master of Arts in International Policy Studies. Shiva is currently the Director of Community Partnerships & Interpreter Services for UW Health and is committed to enhancing community health through targeted work in governmental affairs, minority community initiatives, and community partnerships. Fluent in four languages, Shiva has been a leader for developing language access policies and practices in Dane County, Wisconsin and has worked on issues of equal access to health care for limited English proficient individuals at the national level. Shiva routinely speaks locally and nationally on health care disparities and language access. She has been the recipient of multiple awards including the City of Madison/Dane County Martin Luther King Jr. Humanitarian Award. Shiva is also an Alder for the City of Madison Common Council.

Objectives:
♦ Understand immigrant demographics in Wisconsin.
♦ Analyze barriers for care of immigrants
♦ Discuss ways to improve health care for immigrant

### Categories of Membership

**Regular - $100 Annual membership dues:** Regular members are those who are not full time students or retired persons. They need only have a desire for knowledge in the field of transcultural nursing. Regular members receive all benefits of membership, are eligible to vote, and are able to hold office after three consecutive years of membership.

**Student - $50 Annual membership dues:** Student membership is granted to full time students currently enrolled in classes. They receive all benefits of membership. A copy of your student ID card and/or student schedule is required with membership form.

**Retired - $50 Annual membership dues:** Retired membership is for those members who have retired and would like to maintain their membership. Retired members receive all the benefits of membership, are eligible to vote, and are able to hold office after three consecutive years of membership.

### Membership Benefits Include:

- Subscription to five annual issues of the Journal of Transcultural Nursing
- Online Access to all current and past issues of The Journal of Transcultural Nursing
- Two issues of the TCNS Newsletter annually
- Reduced registration fees for Annual Conferences and Regional Offerings
- Eligibility for Research Award (one $3,000 award annually)
- Eligibility for induction into the TCNS Scholars Program
- Eligibility for Certification in Transcultural Nursing—Basic and Advance
- Networking/collaboration and opportunity to meet scholars and experts in transcultural nursing from around the world.

THE 2015 Dennis G. Maki INFECTIOUS DISEASE UPDATE
DECEMBER 4-5, 2015
Glacier Canyon Lodge Conference Center at The Wilderness Resort
Wisconsin Dells, Wisconsin

Jointly Provided by
University of Wisconsin School of Medicine and Public Health
Office of Continuing Professional Development in Medicine and Public Health
Department of Medicine

and

University of Wisconsin-Madison School of Nursing
Continuing Education in Nursing
Intended Audience & Scope of Practice

This CME/CNE activity is intended for primary care physicians, physician assistants, nurses, and other health care specialists dealing with infectious diseases.

Elements of Competence

This CME/CNE activity has been designed to change learner competence and focuses on the American Board of Medical Specialties areas of patient care and procedural skills, and medical knowledge.

Practice Gaps, Needs and Objectives

The overall objective of this activity is to prevent, accurately diagnose and optimally treat infectious diseases.

Specific learning objectives, based on documented gaps in practice, supported through regional and national data, will address clinical problems related to:

- Skin and soft tissue infections
- Sexually transmitted diseases
- Infectious disease acquired in a community or health care setting
- Midwest vector borne diseases
- Antimicrobial efficacy, safety, and stewardship
- New diagnostic modalities for infectious diseases
- Immunization
- Travel-related infection issues
- Clostridium difficile disease

Participants will also learn about new antimicrobials and other therapeutics, updated practice guidelines, and strategies for prevention including the latest recommendations for vaccines. Case-based discussions will allow participants to identify ways to incorporate learning into their daily practice.

GENERAL INFORMATION

Dates: December 4-5, 2015
Place: Glacier Canyon Lodge Conference Center at The Wilderness Resort
        45 Hillman Road
        Wisconsin Dells, WI 53965
Phone: 1.800.867.9453

CONFERENCE FEES

$395 Physicians
$295 Residents, Physician Assistants, Nurses, Others

Reduced Fee for UW Health/VA Employees:
$265 UW Health/VA Physicians
$195 UW Health/VA Residents, Physician Assistants, Nurses, Others

The conference fee includes the cost of tuition, materials, continental breakfasts, one lunch, refreshment breaks, and a nonrefundable processing fee of $50. Should you cancel your registration up to 72 hours prior to the conference, you will be refunded the entire conference fee except the $50 nonrefundable portion. No refunds will be made after that time. Prepayment is required!

CONFERENCE HOUSING

A block of rooms has been reserved at the conference site, The Glacier Canyon Lodge. Please contact the hotel directly (1.800.867.9453) to arrange your accommodation. To receive the special rate of $99 (plus tax and resort fee) for a Double Queen Couch Glacier Canyon Lodge room or $140 (plus tax and resort fee) for a 2 Bedroom Glacier Canyon Deluxe room, please tell the reservation agent that you are booking a room under the 2015 Dennis G. Maki Infectious Disease Update at Glacier Canyon Lodge, Reservation #431591. The block of rooms will be held on a first-come, first-served basis and any available rooms that have not been reserved by November 10, 2015, will be released to the general public.

CONFERENCE ATTIRE

To ensure your comfort in the conference room, please bring a sweater or jacket to accommodate temperature variations.

CONFERENCE MATERIALS

The course syllabus will be posted online (the link will be sent to registered participants approximately one week before the conference).

FOUR EASY WAYS TO REGISTER

This conference is dedicated to Dennis G. Maki, MD, Emeritus Professor, Department of Medicine, School of Medicine and Public Health, University of Wisconsin-Madison, in recognition of his achievements and contributions as a physician, scholar, and educator in the field of Infectious Disease.
Credit

ACCREDITATION STATEMENT
This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of the University of Wisconsin School of Medicine and Public Health and the University of Wisconsin-Madison School of Nursing, Continuing Education in Nursing. The University of Wisconsin School of Medicine and Public Health is accredited by the ACCME to provide continuing medical education for physicians.

CREDIT DESIGNATION STATEMENT
The University of Wisconsin School of Medicine and Public Health designates this live activity for a maximum of 11.5 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

NURSING CONTINUING EDUCATION
This activity has been planned and implemented using the educational design criteria of the American Nurses Credentialing Center's Commission on Accreditation through the joint providership of the University of Wisconsin-Madison School of Nursing, Continuing Education in Nursing, and the University of Wisconsin School of Medicine and Public Health.

The University of Wisconsin-Madison School of Nursing, Continuing Education in Nursing, is accredited as a provider of continuing nursing education by the American Nurses Credentialing Center's Commission on Accreditation.

The University of Wisconsin-Madison School of Nursing, Continuing Education in Nursing, is Iowa Board of Nursing provider 350.

The University of Wisconsin-Madison School of Nursing, Continuing Education in Nursing, designates this live activity for a maximum of 11.50 ANCC contact hours (13.8 Iowa contact hours). ANCC pharmacotherapeutic contact hours will be calculated and awarded to meet requirements for advanced practice nurses. Successful completion includes attending the sessions, completing the attendance verification form and the online evaluation. Letters of award will be emailed to participants 4-6 weeks after the activity.

CONTINUING EDUCATION UNITS
The University of Wisconsin-Madison, as a member of the University Continuing Education Association (UCEA), authorizes this program for 1.15 continuing education units (CEUs) or 11.5 hours.

POLICY ON FACULTY AND SPONSOR DISCLOSURE
It is the policy of the University of Wisconsin School of Medicine and Public Health and School of Nursing that the faculty, authors, planners, and other persons who may influence content of this CME/CNE activity disclose all relevant financial relationships with commercial interests in order to allow CME/CNE staff to identify and resolve any potential conflicts of interest. Faculty must also disclose any planned discussion of unlabeled/unapproved uses of drugs or devices during their presentation(s). Detailed disclosures will be made in the activity handout materials.
