

I want to check in to make sure that all of you have been successful signing in to eSchoolCare. All grant districts have 2015-16 school year subscriptions to eSchoolCare. Please join me for the Webinar: **Navigating the New and Improved eSchoolCare** on Wednesday, December 9 at 8 am. I will send you instructions to join the webinar as soon as I have them.

- The webinar will be about 45 minutes and will be archived for later viewing
- All subscriptions have been renewed for this school year
- You should have received a “Welcome” email
- The new eSchoolCare web site is hosted by the University of Wisconsin-Madison School of Nursing and can be accessed at <http://son.wisc.edu/eSchoolCare.htm> and will be accessible to you after you register with your welcome email link.
- If you don't find the welcome email in your inbox by Friday, November 6th, please look for it in your junk/spam folders.

Data Collection for grant districts for 2015-16 is required again this year. Please provide the data requested at <http://dpi.wi.gov/sspw/pupil-services/school-nurse/data> by the **June 20, 2016 deadline**. This is the second Year of the national initiative, **Step Up Be Counted**. Collecting data as part of this national initiative is important. The Wisconsin Association of School Nurses (WASN) is supporting this initiative, and many of the WASN members have been involved with the development of the tool, both nationally and here in Wisconsin.

This year, the data collection will add others who provide care and their disposition of students. Wisconsin’s aggregated data will be collectively combined to the national data. Wisconsin will have a different timeline than that of other states—we will collect the data one time only—at the end of the school year. You can visit the DPI data information webpage at <http://dpi.wi.gov/sspw/pupil-services/school-nurse/data> to see additional information. You can also visit the NASN Step Up Be Counted website at <http://www.nasn.org/Research/StepUpBeCounted>.

Read each question carefully, as well as its definition. Also, note that the administering of medications, (daily, prn, and nursing procedures) is a face-to-face time with students and therefore should have a disposition (which would normally be to return to the classroom).
