

HOW TO FIX SCHOOL FUNDING IN WISCONSIN

Make the funding formula and per-pupil aid “smarter”

To energize our economy, our communities, our future leaders and workers, we can make these funding streams smarter - so we charge up weak spots in our “education power grid.”

Raise revenue limits while increasing state funding

Raising limits on schools’ revenue is the only way every community can keep up with costs. Boosting state funding will ease local property taxes, while keeping overall tax burdens reasonable for all.

Stop diverting resources

When we divert “public education” resources to other programs, we drain away our power to build a better future. Until we can massively increase funding, let’s stop diluting the current.

Tell your legislators you support these smart fixes to school funding in Wisconsin.
