WTCS Apprenticeship Vision Statement August 17, 2012

Wisconsin Technical colleges will deliver apprenticeship training in centers of excellence where value added training will be evident to the apprentices, employers and all supporters of apprenticeship. Apprenticeship training will be a collaborative effort between the Bureau of Apprenticeship Standards, state and local committees, employers, apprentices and the technical colleges and will be integrated into a career pathway model which starts in high school and ends in a rewarding career after completion of the apprenticeship. Delivery of instruction by the technical colleges will be dynamic, creative, and cost efficient, using technology and flexible delivery to meet the needs of the employers, apprentices, and the efficiency goal of the colleges. Included in the model is a system of education, communication, measurement, and evaluation that connects the college's training to all of its partners.
