Overview

The Precollege Scholarship Program provides eligible middle and high school students from across the State of Wisconsin an opportunity to experience life on a college campus, in person or virtually, while participating in enriching programs designed to improve college readiness. More specifically, students who have completed 5th grade, and are entering grade 6 through 12 are eligible for the scholarships. Students must be eligible for free or reduced priced meals to receive a DPI Precollege Scholarship.

Precollege programs are classes or activities designed by postsecondary educational institutions to improve students' college readiness and to prepare students for success in postsecondary programs. These programs may be residential or nonresidential (including online) and vary in focus, scope, and length of sessions across campuses throughout the state. Eligible students may receive a maximum of three scholarships per year by completing the DPI Precollege Scholarship Application form (PI-1573).

Individual Precollege Program Information Instructions

Review these instructions before completing the Individual Precollege Program forms for each precollege program you are proposing. It is highly recommended that you consult the Precollege Proposal Application Review Criteria when completing the individual program information.

Section I—General Information

Complete all the information. One Individual Precollege Program Information form must be completed for each precollege program in your proposal. Check one of the boxes in the *Session section*. If you run the same program in multiple sessions, you must submit a form for each offering.

Section II—Description of Program

Provide a brief description of the program including purpose of the program, grade level(s) to be served, target number of students to be served, and the number of days and contact hours the program will run. Proposals that fail to include the total number of days and contact hours will *not* be considered for funding.

Section III—Goals / Objectives

Goals: Identify the goals for this precollege program. When developing goals, keep in mind the purpose of the program. Consider the following when developing goals:

1. Goals should be measurable.
2. Goals should be clearly and concisely written.

Objectives: Objectives provide the framework by which a given goal is met. Clearly written objectives also provide the basis for evaluation methods.

Program objectives must address **at least one** of the following:

1. Preparing students to become college and career ready.
2. Reinforcement in basic skills and competencies such as reading, writing, speaking, listening, mathematics, and reasoning.

3. Reinforcement in skills and attitudes necessary for success in college and employment, including study skills, work habits, and instructor and employer expectations.
4. Special experiences, such as computer camps and workshops in science, mathematics, writing, reading, arts, and the humanities.
5. Reinforcement in employability skills and attitudes.

Precollege Programs may also include other components, such as the following:

1. Information on financial aids available to all pupils.
2. Career guidance and counseling.
3. Information on college living such as dormitory life and support groups.
4. Information on college application procedures.

When developing goals and objectives, please make sure that the SMART technique is used. SMART goals and objectives must be:

Specific

Measurable

Attainable

Realistic

Time-limited

Section IV—Evaluation Plan

The evaluation is defined as a continuous process of systematically gathering, analyzing, and interpreting data and information upon which decisions can be made relative to the effectiveness and efficiency of the program. Describe in detail the evaluation procedures and methods that will be used to determine whether the program's goals and objectives are being met. The evaluation method must be consistent with the measurable outcomes that were described in the goals and objectives section. Evaluation results and measurable outcome data must be reported to DPI in the *End-of-Year Evaluation Report* for each individual Precollege Program offered. (See section IX Report Requirements of these guidelines for more information on the End-of-Year Evaluation Report).

Section V—Scholarship Information

When calculating the cost for each individual precollege program included in the proposal, the per pupil amount for scholarships must be provided, the type of program being offered—residential or nonresidential (including online)—and the number of contact hours provided to participants.

Proposals that fail to include the number of contact hours provided to participants for each individual program will not be considered for funding.

Funding Information

Precollege Scholarship Program funding is contingent upon the 2025-27 Biennial Budget appropriation. Precollege Scholarship Programs are funded on a per pupil served basis. Scholarship awards may not exceed the cost of the precollege program which may include only tuition, books, supplies, and, if applicable, room and board.

Per pupil scholarship funds shall be paid to the postsecondary education institution providing the precollege program in which the pupil is enrolled. If fewer students enroll in a program than estimated in the proposal, reimbursement will be limited to the number of enrolled students. Should a program choose to enroll more students than estimated in the proposal they are only guaranteed reimbursement up to the grant award for that program. Throughout the program year, funding will be analyzed based upon Verification of Enrollment submitted mid-way through each program session. If additional funding is available at the end of the program year within the institution, reallocation of funding *might* be available to reimburse institutions for pupils served over the number estimated in the proposal.

Postsecondary education institutions participating in the DPI Precollege Scholarship Program must conclude all precollege programs and activities by June 30 of each program year, as funding for the next program year is contingent upon the allocation from the State. **Carryover is not allowed.**

Scholarship Recipient Eligibility

Scholarships shall be awarded to economically disadvantaged pupils, as determined by eligibility for free and reduced-price meals. Eligible students may receive three scholarship awards per year, contingent on availability of scholarship funds.

Precollege Scholarship Applications must be completed in full. Incomplete applications will not be accepted. Students that attend a private middle school or high school are encouraged to submit an Alternate Household Income Form in addition to the Precollege Scholarship Application. Students that attend a public middle school or high school will be verified by DPI via WISEdash. An Alternate Household Income Form, signed by authorized school personnel may be requested if a student cannot be verified by DPI.

Scholarship Reimbursement

Postsecondary education institutions shall submit the *Verification of Enrollment* form; scholarship applications; and alternate household income forms, if applicable, for each student enrolled in an individual precollege program at the mid-point of the program (see due dates for each session in Section V). Following the completion of the individual precollege program session, claims for reimbursement for scholarships awarded, not to exceed the total grant award for that program, must be submitted to the DPI pursuant to the schedule outlined in Section V. Verification of Enrollment forms, scholarship applications, and reimbursement claim must be uploaded electronically on the above schedule via secure platform yet to be announced. Individuals listed on the PI-1574 and PI-1574-A forms will receive an access link to your respective campus folder via the email addresses provided to DPI.

Amendments

In circumstances where adjustments or revisions need to be made to Sections I-V of the Individual Precollege Program General Information, as submitted with the Precollege Proposal Application, a justification email may be sent to DPI to be documented accordingly. Anything submitted after the Grant Award Notification has been issued will be considered an amendment and will need to go through the amendment process. Unutilized funds may be evaluated for reallocation to other programs.

This process will be communicated and initiated by the Grant Specialist during the spring cycle of the respective fiscal year, if applicable.

Report Requirements

To ensure continued state funding of the DPI Precollege Scholarship Program, it is necessary to show that precollege programs have a positive impact on student attitudes toward and understanding of college readiness. In addition, it must be established that these state-funded precollege programs are meeting the goals and objectives outlined in the proposal. Consequently, an End-of-Year Evaluation Report is required of all Precollege Scholarship Program grant recipients.

Based upon the SMART goals and objectives of the precollege program and the evaluation method outlined in the proposal **for each individual precollege program**, an evaluation report must be submitted to the DPI by August 1 of each program year. Failure to submit the report may result in a delay in reimbursement or forfeiture of continued Precollege Scholarship Program funding.

Because evaluation is an ongoing process that informs program decisions, the evaluation will need to be more comprehensive than a student satisfaction survey at the end of the individual precollege program. Pre-tests and post-tests are useful evaluation tools, but only if they measure the goals and objectives of the program and provide meaningful information regarding what works well, what is ineffective, and what has potential but might need to be refined. Therefore, it is recommended that the effectiveness of the program be assessed at least once prior to completion so that changes may be implemented if necessary.

The format of the report is flexible, but must include the following elements:

1. Restatement of program's measurable goals and objectives in the approved proposal.
2. Restatement of the evaluation method in the approved proposal.
3. Measurable outcome data on whether or to what extent the program goals and objectives were achieved.
4. Analysis of what was learned from the evaluation process.
5. Conclusions regarding changes or enhancements to the program based upon the evaluation results.
