

Better Information, Better Outcomes

Our State Data System Empowers Schools

WISEdash for Districts

WISEdash for Districts allows you to turn data into information quickly and easily, so you can make more informed decisions about student learning.

Check out these updated features:

- Enhanced dashboards to help with district and school data verification for upcoming snapshots
- Improved supports for data inquiry processes and continuous improvement planning through WISExplore
- Expanded district-wide use of student data to drive school improvement
- Secure platform to view student outcomes that protect student privacy

Enhanced Improvement Planning

The Data Inquiry Journal allows educators and administrators to document ongoing data investigation and design continuous improvement plans all in one convenient location.

Includes all essential components for continuous improvement in one tool.

Meets requirements for continuous improvement planning in ESSA and IDEA.

New Early Warning System

An early warning system provides information to help schools identify students who are not on track for desirable outcomes. An early warning system may also indicate which specific areas are deficient and could be targeted with an intervention. The Dropout Early Warning System (DEWS) and the College and Career Readiness Early Warning System (CCREWS) are both available in WISEdash.

Improved Snapshot Reporting

Use WISEdash to review your data before a snapshot. WISEdash has additional features to help you check your data as you prepare for the snapshot such as viewing current and trend data on topic-specific dashboards as well as advanced analysis snapshot dashboards to view current data and demographics compared to a prior year's snapshot data.
